Faculty of Political Science / SOCIAL POLICY AND SOCIAL WORK / Social Psychology

Course:	Social Psychology			
Course ID	Course status	Semester	ECTS credits	Lessons (Lessons+Exercises+Laboratory)
7475	Mandatory	4	5	2+1+0
Programs	SOCIAL POLICY AND SOCIAL WORK			
Prerequisites	No conditions for enrolment and participation in the course			
Aims	1)Familiarisation with the social conditions, factors, and processes of individual personality development integrated into the social environment and the developmental effects of such integration; 2) Understanding the nature and complementarity of the processes of socialization and individuation; 3) Understanding the experiential, subjective dimension of individual behaviour, recognizing how socio-psychological knowledge can be applied in managing personal and social life; 4) Developing the ability to apply acquired knowledge in understanding socio-psychological phenomena in personal, professional, and social life; 5) Forming a critical attitude towards layman interpretations of socio-psychological phenomena at individual, group, and societal levels; 6) Adopting a constructive approach in analysing and understanding personal experience and the behaviour of others, as well as traditional and current cultural models which organize social life.			
Learning outcomes	After completion of the Social psychology course, the students are going to: - Know and understand the fundamental theoretical concepts and notions from the area of socialisation and attitudes; - Be familiar with significant research from the area of social psychology, and understand the way in which this research contributes to development of psychology; - Be able to assess scientific foundation of individual explanations of social phenomena; - Understand mechanisms and functions of layman theories about the behaviour of individuals and groups; - Be able to use professional literature from the area of social psychology and carry out due interpretation of the findings proposed in the published studies.
