## RESEARCH ACTIVITIES

Research sectors	There are four avenues of research in which I am mainly interested and which are partly interlinked: 1. Biodiversity, ecology, taxonomy and zoogeography of aquatic invertebrates, with special regard to water mites (Hydrachnidia) and freshwater gastropods; 2. Ecological research in springs ecosystem; 3. Ecology of Intermittent Rivers and Ephemeral Streams. 4. Environmental Monitoring
------------------	---

I described more than 300 species new for science from all parts of the world.
