The Impact of Socio-Economic Status on Obesity of Adolescents in the Largest Municipality in the Former Yugoslavia

(Received 10 Jul 2021; accepted 23 Jul 2021)

Dear Editor-in-Chief

In the 21st century, obesity is characterized as a public health problem, and in many countries in the world is characterized as an epidemic (1). Obesity is one of the factors that increases the risk of coronary disease, stroke, as well as diabetes mellitus and characterize it as the basic benchmark of a person's health (2). In addition, one of the key benchmarks for obesity could be socio-economic status (SES) and economic insecurity (3). The household wealth and level of parental education are the most relevant indicators of SES, which can affect the risk of obesity among children (4).

Given that a positive ratio of overweight and obesity with SES has been confirmed in many developing countries, which the World Bank defines as countries with per capita income up to \$12,275 (5), including Montenegro (6), it can be said that there is fear that Montenegro may have the same trend.

The aim of this research was to determine the impact of SES on obesity of adolescents in Niksic (Montenegro), the largest municipality in the former Yugoslavia. The total number of examinees in this study was 95, aged 15 years. The total sample of examinees was divided into two sub-samples. First sub-sample of the examinees consisted of 44 boys, while the second consisted

of 51 girls. All participants gave informed consent before the study.

For the purposes of this research, the following anthropometric indices were formed to evaluate nutritional status: Body mass index (BMI), waist-to-hip ratio (WHR), and waist-to-high ratio (WHtR). The normative values for healthy weight of the above-mentioned indices for boys were as follows: BMI-16.5 to 23.7 kg/m² (5-85th percentile), WHR ratio was set at 1. The normative values for girls were as follows: BMI-16.5 to 22.8 kg/m² (5-85th percentile), WHR ratio was set at 0.8, WHtR ratio for both genders was set at 0.5. Moreover, bio-impedancemetry body composition analyzer, Jawon Medical iol 353, was used to evaluate the level of visceral fat of respondents (V.F.A.). According to research so far, the normal value of V.F.A. for ages 10 to 15 yr was set at 68.57 cm² for both genders (7), and the normal level range was from 1 to 9. A standardized questionnaire European Childhood Obesity Surveillance Initiative - COSI (8) was used to evaluate SES.

Due to a small sample of respondents, the questionnaire was modified and categories were reduced. Namely, three categories have been set for education: 1. Primary school or less; 2. Secondary, High school; 3. Undergraduate, Bachelor degree or higher. For household wealth were set

two categories: 1. High household wealth; 2. Low household wealth. Binary logistical regression analysis was used to show the association between SES and obesity. The connection was shown as odds ratio (OR) with a 95% confidence interval, and a significance of $P \geq 0.05$.

Regarding boys, analyzing the results obtained by the assessment between SES and BMI-percentiles (mother's education-OR=1.77, household wealth-OR=1.25), and V.F.A. (mother's education-OR=2.09) can be said that the situation is similar to many developing countries. Namely, the results are approaching expectations that children will be more obese if the education of mothers is higher, and the greater the household wealth is. Other variables did not yield enough reliable results to draw any conclusion. When it comes to girls, the results obtained by the assessment between SES and BMI-percentiles (mother's education-OR=0.13, father's education-OR=0.58), WHR (mother's education-OR=0.63) and WHtR (mother's education-OR=0.65, father's education-OR=0.76) indicate that situation is such as in developed countries, when it comes to the parental education, especially mothers (i.e. the higher the level of education is, the chance of obesity is lower). As for other variables, there was no data that could be used to tell if expectations set in the method, were met. There was no statistical significance in mentioned variables in both cases, but results showed that problem was worth attention.

As a limitation of this study, it can be said that the sample was collected during the COVID-19 pandemic and that the work cessation of schools limited the sample of respondents to be larger. Certainly this does not diminish the importance of this study, which is preliminary in Montenegro when it comes to SES and obesity. Also, the recommendation for future research would be to conduct the same research after the end of the

COVID-19 pandemic, and to evaluate impact of pandemic on above-mentioned trends in the entire Montenegro.

The authors declare that there is no conflict of interests.

U zvanje redovnog profesora Univerziteta Crne Gore za predmete: Osnovi antropomotorike, Metodika antropomotorike, Atletika I i Atletika II na Fakultetu za sport i fizičko vaspitanje u Nikšiću izabran sam odlukom Senata Univerziteta Crne Gore, broj: 08-1419, u Podgorici 28. 05. 2015. godine.

Rođen sam 12. avgusta 1970. godine u Nikšiću. Osnovnu školu sam završio u rodnom gradu 1984. godine. U toku osnovne škole dva puta sam biran za učenika godine i nosilac sam diplome "Luča".

Srednju Mašinsko tehničku školu sam završio u Sarajevu 1988. godine, a u istom gradu sam u periodu od 1989. do 1992. godine odslušao prve tri godine Fakulteta za fizičku kulturu. Bio sam najuspješniji student prve godine.

Na Filozofskom fakultetu u Nikšiću 3. novembra 1992. godine stičem diplomu nastavnika fizičkog vaspitanja, a 5. maja 1995. godine diplomu nastavnika razredne nastave. U Prištini na Fakultetu za fizičku kulturu 24. juna 1998. godine diplomiram sa ocjenom 10 i postajem profesor fizičke kulture.

Poslijediplomske studije upisujem na Fakultetu fizičke kulture u Novom Sadu školske 1999/2000. godine i završavam ih kao prvi u generaciji 15. jula 2002. godine odbranivši magistarsku tezu «Relacije motoričkih sposobnosti i morfoloških karakteristika sa sprinterskom brzinom kod učenica srednje škole». Na istom fakultetu sam 29. 10. 2004. godine odbranio doktorsku disertaciju «Struktura i relacije motoričkih sposobnosti i morfoloških karakteristika sa brzinom i eksplozivnom snagom školske omladine».

U dva navrata sam, februar 2006. i februar 2008. godine, studijski boravio na Kineziološkom fakultetu u Zagrebu sa ciljem specijalističkog usavršavanja iz oblasti kondicionog treninga.

Specijalističko usavršavanje sam nastavio i u narednom periodu kroz studijske boravke u:

- Dublinu (Republika Irska) septembar mjesec 2010. godine,
- Madridu (Španija) novembar mjesec 2011. godine,
- Istanbulu (Turska) avgust mjesec 2013. godine i u
- Amsterdamu (Holandija), novembar mjesec 2013. godine.

Stalni radni odnos sam zasnovao 23. oktobra 1995. godine u Osnovnoj školi „Savo Pejanović“ u Podgorici.

Kao saradnik stipendista Univerziteta Crne Gore od 6. marta 2001. godine počinjem da radim na Filozofskom fakultetu u Nikšiću i to na Odsjeku za fizičku kulturu. U zvanje asistenta sam biran 23. septembra 2003. godine. U početku sam izvodio vježbe samo na predmetu Osnovi antropomotorike, dok sam u školskoj 2002/2003. godini osim iz predmeta Osnovi antropomotorike izvodio vježbe i iz predmeta Plivanje i Logorovanje, a u 2003/2004. i iz predmeta Skijanje. Od početka školske 2004/2005. godine na osnovu Odluke Univerziteta Crne Gore i Studijskog programa za fizičku kulturu Filozofskog fakulteta, pored vježbi započinjem izvoditi i predavanja za predmet Osnovi antropomotorike, a u ljetnjem semestru i za predmet Metodika antropomotorike.

Odlukom Senata Univerziteta Crne Gore, broj 01-1167, u Podgorici 26. 05. 2005. godine, izabran sam u akademsko zvanje docent Univerziteta Crne Gore za predmete: Osnovi antropomotorike i Metodika antropomotorike na Studijskom programu fizička kultura na Filozofskom fakultetu u Nikšiću.

Odlukom Senata Univerziteta Crne Gore, broj: 08-710, u Podgorici 29. 04. 2010. godine, izabran sam u akademsko zvanje vanredni profesor Univerziteta Crne Gore za predmete: Osnovi antropomotorike, Metodika antropomotorike, Atletika I i Atletika II na Fakultetu za sport i fizičko vaspitanje u Nikšiću.

Oženjen sam i otac sam dvoje djece.
