UNIVERZITET CRNE GORE
CENTAR ZA DOKTORSKE STUDIJE
KOMISIJI DOKTORSKIH STUDIJA ODRŽIVI RAZVOJ

Predmet: Predlog Komisije za ocijenu podobnosti doktorske teze

Predlažem Komisiju za ocjenu podobnosti doktorske teze pod nazivom „**Utvrđivanje prisustva rezistencije na antibiotike kod bakterija u vodama rijeke Bojane i plažama Ulcinja primjenom tehnike sekvenciranja cijelog genoma**“ kandidata mr Osmana Šurle u sastavu:

1. Prof. dr Nedeljko Latinović, redovni profesor Biotehničkog fakulteta Univerzitet Crne Gore (predsjednik komisije)
2. Prof. dr Svetlana Perović, redovni profesor Prirodnno-matematičkog fakulteta Odsjek za biologiju, Univerzitet Crne Gore (član komisije)
3. Prof. dr Aleksandra Martinović, redovni profesor Fakulteta za prehrambenu tehnologiju i bezbjednost hrane, Univerzitet Donja Gorica (mentor)

Prof. dr Aleksandra Martinović

Podgorica, 16.01.2023. godine

PRIJAVA TEME DOKTORSKE DISERTACIJE

OPŠTI PODACI O DOKTORANDU	
Titula, ime i prezime	Mr Osman Šurla
Fakultet	Univerzitet Crne Gore
Studijski program	Održivi razvoj
Broj indeksa	4/21
Ime i prezime roditelja	Suad Šurla
Datum i mjesto rođenja	09.05.1984 godine, Bar
Adresa prebivališta	Ulica Nikole Đakonovića br 14, Ulcinj
Telefon	+382 69 554 492
E-mail	osmansurla@gmail.com
BIOGRAFIJA I BIBLIOGRAFIJA	
Obrazovanje	<p>Postdiplomske akademske magistarske studije, Prirodno-matematički fakultet, Odsjek za biologiju, stečeno zvanje magistr biologije, 2020 god.</p> <p>Osnovne studeje, Prirodno-matematički fakultet, Odsjek za biologiju, stečeno zvanje diplomirani biolog, 2008 god.</p>
Radno iskustvo	<p>Profesor biologije, JU SMŠ „Bratstvo-jedinstvo“ Ulcinj, od 2013 godine</p> <p>Pripravnik mikrobiolog, ZU Institut za javno zdravlje Crne Gore, od 2009 – 2010 godine</p>
NASLOV PREDLOŽENE TEME	
Na službenom jeziku	Utvrđivanje prisustva rezistencije na antibiotike kod bakterija u vodama rijeke Bojane i plažama Ulcinja primjenom tehnike sekvenciranja cijelog genoma
Na engleskom jeziku	Determination of antimicrobial resistance in bacteria in the waters of the Bojana River and the beaches of Ulcinj based on whole genome sequencing
Obrazloženje teme	
<p>Slatkovodni i morski ekosistemi su veoma važne komponente cikličnog kruženja vode. Oni su takođe i pogodno stanište, izvor hrane i vode za piće za mnoge organizme, a i za humanu populaciju. U poslednje vrijeme, u fokusu pažnje naučne i stručne javnosti posebno mjesto zauzima oblast koja se odnosi na prekomjernu upotrebu antibiotika i posljedica takve upotrebe. Antibiotici, kao kontaminenti, mogu dospijeti u vodene ekosisteme iz različitih izvora, uzrokujući pojavu antibiotske rezistencije u populaciji mikroorganizama koji ih nastanjuju. To za posljedicu ima evidentno širenje antibiotske rezistencije kod ljudi i uzgojenih životinja. Nekoliko antibiotika</p>	

i sa njima povezani geni rezistencije kod bakterija otkriveni su u ovim ekosistemima kroz brojne istraživačke programe, a potencijalno predstavljaju značajan problem za javno zdravlje. Prisustvo antibiotika i drugih kofaktora otpornosti može podstićati razvoj gena otpornosti u hromozomima ili mobilnim genetičkim elementima kod bakterija koje se nalaze u vodenim ekosistemima.

Geni otpornosti na antibiotike u bakterijama životne sredine se mogu prenijeti na klinički važne patogene. Međutim, nacionalne ili međunarodne vlasti odgovorne za kontrolu kvaliteta vodenih tijela trenutno ne prate antibiotike i njihove gene otpornosti. Oni nisu uključeni na listu zagađivača u Evropskoj okvirnoj direktivi o vodama i američkoj listi pokazatelja kvaliteta vode za zagađivače. Geni otpornosti na antibiotike su prirodno prisutni kod bakterija vodenih ekosistema ali se njihova frekvencija, učestalost kao i nove forme ovih gena mogu povećati dodatnim unosom antibiotika. Iz ovog razloga je neophodno uvesti praćenje ovih parametara kao standardnu proceduru za praćenje stanja u životnoj sredini. Dobijene podatke bi trebalo iskoristiti u donošenju zakonskih regulativa i kreiranju programa za održivo upravljanje vodenim resursima.

Ovaj rad je zasnovan na navedenim činjenicama i ima za cilj da utvrdi prisustvo gena rezistencije na antibiotika u vodenim ekosistemima rijeke Bojane i plažama Ulcinja. Kroz ovo istraživanje će se utvrditi prisustvo ovih gena na više pažljivo odabranih lokacija, a takođe će se pratiti i njihove sezonske promjene u toku godine.

Pregled istraživanja

Brza pojava antimikrobne rezistencije u mikroflori ljudi i životinja je stvar globalne zabrinutosti. Glavni uzročnik ove pojave je prekomjerna upotreba antibiotika (Grenni et al., 2018; Laxminarayan, 2014; Sousa et al., 2018), što podrazumjeva unos velike količine gena otpornosti na antibiotike u životnu sredinu, uključujući i vodene ekosisteme. Kontaminacija vode se uglavnom javlja kao posljedica ispuštanja otpada porijekлом od uzgojnih životinja u poljoprivredi (He et al., 2020), efluenata iz bolnica i postrojenja za precišćavanje otpadnih voda (Osinska et al., 2020; Rizzo et al., 2013), uključujući i one od proizvođača antibiotika (Hassoun-Kheir et al., 2020). Postrojenja za precišćavanje otpadnih voda nisu u stanju da potpuno eliminišu antibiotike jer nisu dizajnirani za njihovo uklanjanje (Wang & Chen, 2020).

Od vremena kada je penicilin korišćen za liječenje ljudskih infekcija 1940. godine, stotine antibiotika su izolovani ili sintetizovani i korišćeni u kliničkoj medicini, poljoprivrednoj sadnji, stočarstvu, akvakulturi i drugim poljima (Wang et al., 2020). Međutim, većina različitih vrsta antibiotika koji se koriste u različitim oblastima će na kraju dospjeti u životnu sredinu u nemetabolizovanom obliku kroz različite oblike otpada, kao što su poljoprivredne i farmaceutske otpadne vode, ljudski i životinjski feces (Zhang et al., 2022). S obzirom da rijeka Bojana protiče kroz Crnu Goru i Albaniju, velika je vjerovatnoća da se na ovom putu unosi značajna količina antibiotika, kaja pomoću riječnog toka dospjeva u more.

Studije su dokazale da geni otpornosti na antibiotike mogu opstati u okolini i da se mogu širiti u njoj, oslanjajući se na mobilne genetske elemente (npr. sekvencu umetanja, integrone i plazmide) horizontalnim transferom gena između različitih bakterijskih zajedница, koje mogu imati štetniji uticaj na ekološku sredinu i zdravlje ljudi nego sami antibiotici (Zhang et al., 2021; Corcoll et al., 2014). Pored toga, faktori životne sredine kao što su temperatura, hranljive materije i teški metali mogu uticati na horizontalni transfer gena bakterijskih zajedница u vodi i sedimentima (Zhang et al., 2022).

Antimikrobna rezistencija je sada prepoznata kao jedna od 10 najvećih pretnji globalnom zdravlju, sa trenutnim trendovima otpornih infekcija kod ljudi i uzgojnih životinja koje ukazuju na potencijalnu postantibiotsku eru. Društveni i ekonomski teret antimikrobne rezistencije se još uvijek utvrđuje, ali neke stroge projekcije predviđaju da će otporne bakterijske infekcije postati vodeći uzrok smrti širom svijeta do 2050. godine (Liguori et al., 2022).

Globalni i nacionalni akcioni planovi za borbu protiv antimikrobne rezistencije su generalno

obuhvaćeni u okviru One Health inicijative (ljudi–životinje–životna sredina); (Hernando-Armado et al,2019). Međutim, sve više se prihvata činjenica da više pažnje treba usmjeriti na ekološku dimenziju ovog problema. Potreba da se bolje razumije uloga životne sredine u širenju bakterija otpornih na antibiotike i gena rezistencije na antibiotike unutar i između ljudi, biljaka i životinja naglašena je u Nacionalnom akcionom planu SAD za borbu protiv bakterija otpornih na antibiotike, gdje je ključni cilj ažuriranje podataka za 2020. godinu i veći nadzor. U sektoru životne sredine, različiti su putevi razvoja i širenja antimikrobne rezistencije, ali veliki broj istraživanja je pokazalo da vodena sredina predstavlja objedinjujući put prenosa. Uticaj antimikrobne rezistencije iz životne sredine na ljude može se ostvariti kroz kontakt sa vodom ili aerosolima. Ovo uključuje i kontaminiranu vodu za piće, hranu ili vodu za rekreaciju, što može dovesti do kolonizacije kože, gastrointestinalnog, urogenitalnog i respiratornog sistema i/ili infekcije rezistentnim bakterijama (Price et al, 2012; Leonard, 2015; Xie et al, 2019; Nordstrom, 2013). Uprkos dokazima da vodena sredina igra važnu ulogu, neophodne su studije koje kvantifikuju tu ulogu i povezuju je sa mogućim rizicima, što dalje naglašava potrebu za uspostavljanje dugoročnih uporedivih podataka praćenja u okviru One Health inicijative. Osnovni kamen spoticanja za unapređenje praćenja antimikrobne rezistencije vodenog okruženja je nedostatak dogovorenih ciljeva i standardizovanih metoda, uključujući nedostatak podataka o benčmarkingu i pragovima za informisanje o evolucionim, epidemiološkim i drugim naporima modeliranja rizika(Liguori et al, 2022).

Razumijevanje prisustva patogena i determinanti antimikrobne rezistencije u površinskim vodama pomaže u informisanju o rizicima u širokom spektru primjena i obezbeđuje integrativni pristup javnom zdravlju. Prepoznajući značajan zdravstveni uticaj koji voda iz životne sredine ima na ljude, životinje i životnu sredinu (Sanganyado, 2019; Wang, 2016; Zang 2009) Nacionalni sistem za praćenje antimikrobne rezistencije (NARMS) istražuje površinske vode kao potencijalni ekološki modalitet za praćenje antimikrobne rezistencije u okviru One Health inicijative. Ova strategija zahtjeva metodološke pristupe koji mogu analizirati antimikrobnu rezistenciju u vodenom ekosistemu koji je složen i razblažen. Trenutni napor za praćenje NARMS-a koriste standardno *in vitro* testiranje osjetljivosti na antimikrobne lijekove da bi se generisale minimalne inhibitorne koncentracije i sekvenciranje cijelog genoma da bi se predviđeli rezistentni fenotipovi direktno iz informacija sadržanih u genima (Nguyen, 2019; Tyson, 2018).

Cilj i hipoteze

Ciljni rada su:

- Utvrđivanje prisustva i strukture gena rezistencije na antibiotike kod bakterija izolovanih sa odabranih lokacija rijeke Bojane i sa plaža u Opštini Ulcinj
- Praćenje longitudinalnih promjena u genima rezistencije na antibiotike duž rijeke Bojane
- Praćenje promjena u genima rezistencije na antibiotike na plažama Ulcinja
- Analiza uticaja rijeke Bojane na antimikrobnu rezistenciju morske vode na plažama Ulcinja
- Utvrđivanje sezonske promjenljivosti u odnosu na prisustvo ovih gena
- Utvrđivanje prisustva patogenih bakterija koje posjeduju gene otpornosti na antibiotike
- Formiranje baze podataka za dalje praćenje stanja u životnoj sredini
- Istraživanje mogućnosti za standardizaciju postupka za praćenje antimikrobne rezistencije u vodi

Svi pomenuti ciljevi će se realizovati na osnovu sledećih postavljenih hipoteza:

Hipoteza 1:

U rijeci Bojani i na plažama Ulcinnja je preko otpada i otpadnih voda različitog porijekla ispuštena nepoznata količina antibiotika, čija je upotreba povećana za vrijeme pandemije virusom COVID 19.

Hipoteza 2:

Bakterije koje žive u vodama rijeke Bojane i plažama Ulcinja su razvile otpornost na antibiotike kao posledica javljanja novonastalih gena otpornosti na antibiotike u njihovom genomu.

Hipoteza 3:

Na antimikrobnu rezistenciju utiču različiti faktori koji se mijenjaju u longitudinalnom pravcu rijeke i u moru.

Hipoteza 4:

Na antimikrobnu rezistenciju utiču sezonske promjene u toku godine.

Materijali, metode i plan istraživanja

Sve aktivnosti vezane za izradu doktorske disertacije se mogu podijeliti na teorijsko, terensko i laboratorijsko istraživanje. Teorijsko istraživanje obuhvata pregled stručne literature i naučnih radova iz ove oblasti. Podaci iz različitih naučnih radova i stručne literature će se analizirati i koristiti za planiranje drugih aktivnosti i za izvođenje zaključka.

U okviru terenskog istraživanja će se vršiti analiza terena i odabir lokacija za uzimanje uzoraka. Na osnovu rezultata dobijenih tokom analize, definisano je planirano uzorkovanje vode na šest pažljivo odabranih lokacija. Freskanjel, Sveti Nikola i ušće rijeke Bojane su tri lokacije sa kojih će se uzorkovati riječna voda. Mala plaža, Velika plaža i Valdanos su tri lokacije sa kojih će se uzorkovati morska voda. Sa ovih lokacija će se uzimati uzorci po standardizovanoj metodi za uzorkovanje površinskih voda koja podrazumjeva uzimanje uzorka od 500ml do 2l u sterilnoj boci, 30 cm ispod površine vode.

Prikupljeni uzorci će se transportovati u laboratoriji gdje će biti podvrgnuti filtraciji. Filtracija uzorka vode sa terena upotrebom nitroceluloznog filtera, veličine pora od $0,22 \mu\text{m}$, u sistemu za membransku filtraciju vode sa vakum pumpom, omogućava zadržavanje prisutnih mikroorganizama u ispitivanom uzorku. Nakon toga, biće izvršena ekstrakcija cijelokupne DNK primjenom DNeasy PowerWater protokola. Izolovana DNA će zatim biti podvrgnuta analizi metagenoma postupkom sekvenciranja cijelog genoma (Whole Genome Sequencing). Za sekvenciranje genoma će se koristiti Illumina i Nanopore tehnologije za sekvenciranje genoma. Illumina predstavlja tehnologiju sekvenciranja druge generacije dok sekvenciranje pomoću Nanopore sekvencera predstavlja tehnologiju treće generacije. Paralelno će se koristiti obije metode i vršiće se upoređivanje dobijenih rezultata. Metode sekvenciranja cijelog genoma koje će biti primjenjene, omogućiće dobijanje podataka o diverzitetu vrsta i sojeva bakterija u analiziranim uzorcima i prisustvo gena rezistencije na antibiotike. Svi dobijeni podaci će se obrađivati pomoću posebnih softvera koji vrše analizu genskih sekvenci.

Postupak uzorkovanja i analiza uzorka biće ponovljeni više puta u toku godine. Planirano je da se uradi analiza za zimski, proljetni, ljetnji i jesenji period. Dobijeni rezultati će se upoređivati i

koristiće se za utvrđivanje sezonske promjenljivosti u genima otpornosti na antibiotike. Svi dobijeni podaci biće predstavljeni tabelarno i grafički primjenom Principal Component Analysis (PCA) softverskog statističkog programa koji omogućava međusobnu uporedivost rezultata na više nivoa. Ovakav prikaz će omogućiti bolju interpretaciju rezultata i preciznije izvođenje zaključaka.

Na kraju će se svi dobijeni podaci, sa stručnom interpretacijom i izvedenim zaključcima, koristiti za pisanje doktorske disertacije po strogo definisanim pravilima akademskog pisanja.

Očekivani naučni doprinos

Ovaj naučni rad će biti jedan od prvih naučnih radova o antimikrobnoj rezistenciji zasnovanoj na sekvenciranju cijelog genoma u Crnoj Gori. Omogućice bolje razumjevanje procesa stvaranja antimikrobne rezistencije u životnoj sredini. Daće jako važne podatke o uticaju nekontrolisane upotrebe antibiotika na životnu sredinu. Takođe će omogućiti predviđanje mogućih štetnih uticaja i potencijalnih rizika za javno zdravlje stanovnika ovog područja. Ovaj rad će dati veliki doprinos u otkrivanju gena otpornosti na antibiotike u vodi i omogućice bolje razumjevanje uticaja različitih spoljašnjih faktora na ove gene. Nadalje, rad će pružiti saznanja o prisustvu i strukturi ovih gena kod bakterija koje žive u vodama rijeke Bojane i plažama Ulcinja. Takođe će se uspostaviti baza podataka koja će se koristiti za dalje praćenje stanja u životnoj sredini. Na osnovu tih podataka po prvi put steći će se uvid u stepen prisustva gena rezistencije ovih bakterija na antibiotike kao i o mogućim potencijalnim rizicima za horizontalni transfer gena na patogene bakterije. Time će moći da se predvide mogućnosti za pojavu patogenih bakterija otpornih na antibiotike i rizici od mogućih epidemija.

Dobijeni podaci će biti jako značajni za dalja istraživanja antimikrobne rezistencije u Crnoj Gori kao i za donošenje različitih strategija i regulativa za održivo upravljanje vodenim resursima.

Ovaj rad će dati i veliki doprinos u standardizaciji metoda i postupka za praćenje antimikrobne rezistencije u životnoj sredini, čime će se olakšati dalja istraživanje i omogućiti veća preciznost i efikasnost.

Biografija

Prof. dr Nedeljko Latinović

Rođen sam 14. marta 1971. godine u Bihaću (BiH). Školske 1990/91. godine upisao sam Poljoprivredni fakultet Univerziteta u Beogradu, odsjek za voćarstvo i vinogradarstvo. Fakultetsku diplomu stekao sam 30. juna 1997. godine odbranom diplomskog rada pod nazivom "Ispitivanje prolećnog razvoja pčelinje zajednice u voćnoj paši". Postdiplomske studije iz oblasti fitofarmacije, upisao sam školske 1997/98. na Poljoprivrednom fakultetu u Novom Sadu. Magistarsku tezu pod nazivom: "Hemisko suzbijanje bele leptiraste vaši citrusa *Dialeurodes citri* Ashmead (Homoptera, Aleurodidae)" odbranio sam 26.10.2001. godine. Doktorsku disertaciju pod naslovom: "Model zaštite vinove loze od ekskorioze u uslovima podgoričkog vinogorja", odbranio sam 15. marta 2007. godine, na Poljoprivrednom fakultetu u Beogradu, nakon čega sam promovisan u doktora biotehničkih nauka, oblast zaštita bilja i prehrabnenih proizvoda. Specijalizacije iz oblasti Integralne zaštite bilja obavio sam u Italiji (2006), Sjedinjenim Američkim Državama (2006), Njemačkoj (2019), a iz oblasti registracije sredstava za zaštitu bilja u Sloveniji (2010, 2016) i Velikoj Britaniji (2013). Učestvovao sam na brojnim skupovima iz oblasti zaštite bilja i bezbjednosti hrane (Austrija, Italija, Grčka, Belgija, Luksemburg, Francuska, Hrvatska, Kipar, Mađarska, Litvanija, Njemačka, Srbija, Bosna i Hercegovina), gdje sam prezentovao radeve putem postera i usmenih prezentacija. Do sada sam objavio preko 160 naučnih i stručnih radova u domaćim i međunarodnim časopisima i skupovima u zemlji i inostranstvu.

Član sam Odbora za strateško planiranje razvoja nauke i umjetnosti Univerziteta Crne Gore, član Komisije za doktorske studije Biotehničkog fakulteta i rukovodilac studijskog programa Biljna proizvodnja na Biotehničkom fakultetu od školske 2013/2014 godine.

Član sam predsjedništva Udruženja mikrobiologa Crne Gore, član Društva za zaštitu bilja Srbije i Međunarodnog savjeta za bolesti drveta vinove loze (ICGTD). Oženjen sam i imam dvoje djece.

PODACI O RADNIM MJESTIMA I IZBORIMA U ZVANJE Od 1. februara 1999. godine zaposlen sam u Biotehničkom institutu (sada fakultetu) u Podgorici kao istraživač saradnik iz oblasti fitofarmacije, a zvanje viši istraživač za fitofarmaciju na Univerzitetu Crne Gore stekao sam 09.07.2002. godine. U zvanje docenta za oblast Fitofarmacije (predmeti Fitofarmacija, Tehnologija zaštite bilja i Sredstva za zaštitu bilja) na Biotehničkom fakultetu izabran sam 25.12.2008. godine prema Odluci Univerziteta Crne Gore br. 01-2651, a u zvanje vanrednog profesora za predmete: Fitofarmacija, Tehnologija zaštite bilja i Sredstva za zaštitu bilja na Biotehničkom fakultetu, prema Odluci Univerziteta Crne Gore br. 08-577, izabran sam 26.02.2015. godine. Na Biotehničkom fakultetu u Podgorici angažovan sam kao nastavnik na osnovnim akademskim studijama, smjer Biljna proizvodnja na predmetu Fitofarmacija, a na specijalističkim studijama, smjer Zaštita bilja na predmetima Sredstva za zaštitu bilja i Tehnologija zaštite bilja. Na magistarskim akademskim studijama, smjer Zaštita bilja, nastavnik sam na predmetima Poljoprivredna toksikologija i Rezistentnost na pesticide, i 1/3 predmeta Metode istraživačkog rada u fitomedicini. Na master studijama po zadnjem akreditovanom programu predviđeno je da od školske 2020/2021 godine izvodim predavanja na sljedećim predmetima:

Sredstva za zaštitu bilja i Tehnologija zaštite bilja. Na doktorskim studijama sam predavač na predmetu Pesticidi i jedan od četiri predavača na predmetu Održiva poljoprivreda. Na osnovnim primjenjenim studijama u Bijelom Polju, smjer Kontinentalno voćarstvo saradnik sam na predmetu Bolesti voćaka.

RADOVI U NAUČNIM ČASOPISIMA NA SCI I SCIE LISTAMA posljednjih 5 godina

Q1 Rad u vodećem međunarodnom časopisu

Gonzalez-Dominguez, E., Caffi, T., Paolini, A., Mugnai, L., **Latinović, N.**, Latinović, J., Languasco, L. and Rossi, V. (2022): Development and validation of a mechanistic model that predicts infection by *Diaporthe ampelina*, the causal agent of Phomopsis cane and leaf spot of grapevines. *Frontiers in Plant Science* (section Plant Pathogen Interactions). Vol. 13, article 872333.

González-Domínguez, E., Caffi, T., Languasco, L., **Latinovic, N.**, Latinovic, J., Rossi, V. (2021): Dynamics of *Diaphorthe ampelina* conidia produced on grape canes overwintered in the vineyard. *Plant Disease*. 105(10), 3092-3100.

Kavran, M., Pajović, I., Petrić, D., Ignjatović-Ćupina, A., **Latinović, N.**, Jovanović, M., Quarrie, S.A., Zgomba, M. (2020): Aquatain AMF efficacy on juvenile mosquito stages in control of *Culex pipiens* Complex and *Aedes albopictus*. *Entomologia Experimentalis et Applicata*, 168(2), 148-157.

Latinovic, J., **Latinovic, N.**, Jakse, J., Radisek, S. (2019): First report of *Erysiphe elevata* causing powdery mildew on *Catalpa bignonioides* in Montenegro. *Phytopathologia Mediterranea*. 58(3): 693-698.

Latinović, N. and Latinović, J. (2017): Influence of rainfall on development of esca disease. *Phytopathologia Mediterranea* (ISSN 0031-9465), 56, 3, 537–538.

Latinović J., Kandić, B. and **Latinović, N.** (2017): Survey on the distribution of fire blight pathogen, *Erwinia amylovora*, on pome fruits in Montenegro. *Phytopathologia Mediterranea* (ISSN 0031-9465), vol. 56, No. 2, 322.

Q2 Rad u eminentnom međunarodnom časopisu

Latinovic, J., **Latinović, N.**, Jakse, J. and Radisek, S. (2019): First Report of White Rust of Rocket (*Eruca sativa*) Caused by *Albugo candida* in Montenegro. *Plant Disease* (ISSN: 0191-2917). Vol. 103, No. 1, p 163.

Latinovic, J., Radisek, S., Bajceta, M., Jakse, J. and **Latinović, N.** (2019): Viruses associated with fig mosaic disease in different fig varieties in Montenegro. *The Plant Pathology Journal* (ISSN 1598-2254). Vol. 35, No. 1, p. 32-40.

Latinovic, J., Sabovljevic, M., Vujicic, M., **Latinovic, N.**, Sabovljevic, A. (2022): Effects of the leafy liverwort extract on plant pathogenic fungi causing olive fruit rot and gray mold of strawberry. *Phytopathologia Mediterranea*, Vol 61, No 1. 225-226.

Vujanovic, V., Kim, S.H., Latinovic, J., Latinovic, N. (2020): Natural Fungicolous Regulators of *Biscogniauxia destructiva* sp. nov. that causes Beech Bark Tarcrust in Southern European (*Fagus sylvatica*) Forests. *Microorganisms*, 8(12), 1999.

Jaćimović, Ž., Kosović, M., Kastratović, V., Holló, B.B., Mészáros Szécsényi, K. Miklós Szilágyi, I., Latinović, N., Vojinović-Ješić, Lj., Rodić, M. (2018): Synthesis and characterization of copper, nickel, cobalt, zinc complexes with 4-nitro-3-pyrazolecarboxylic acid ligand. *Journal of Thermal Analysis and Calorimetry* (ISSN: 1388-6150). Vol. 133, No. 1, 813-821.

Latinović, J., **Latinović, N.**, Karaoglanidis, G. S. (2017): First Report of Brown Rot Caused by *Monilinia fructicola* on Nectarine Fruit in Montenegro. *Plant Disease* (ISSN: 0191-2917), June, Volume 101, Number 6, Page 1045.

Jaćimović, K.Ž., Giester, G., Kosović, M., Bogdanović, A.G., Novaković, B.S., Leovac, M.V., **Latinović, N.**, Holló, B.B., Mészáros Szécsényi, K. (2017): Pyrazole-type complexes with Ni(II) and Cu(II), Solvent exchange reactions in coordination compounds. *Journal of Thermal Analysis and Calorimetry* (ISSN: 1388-6150). Volume 127, Issue 2, pp 1501–1509.

Q3 Rad u međunarodnom časopisu

Kosović, M., Novaković, S., Jaćimović, Ž., **Latinović, N.**, Marković, N., Đorđević, T., Libowitzky, E., Giester, G. (2020): Synthesis, crystal structure and biological activity of copper(II) complex with 4-nitro-3-pyrazolecarboxylic ligand. *Journal of the Serbian Chemical Society*. 85 (7) 885–895.

Latinovic, N., Sabovljevic S.M., Vujicic, M., Latinovic, J., Sabovljevic, D.A. (2019): Growth suppression of plant pathogenic fungi using bryophyte extracts. *Bioscience Journal* (ISSN 1981-3163). 35(4), p. 1213-1219.

Q4 Rad u međunarodnom časopisu

Sabovljević, M.S., Tomović, G., Niketić, M., Lazarević, P., Lazarević, M., Latinović, J., **Latinović, N.**, Kabaš, E., Djurović, S.Z., Kutnar, L., Skudnik, M., Pantović, J., Stevanoski, I., Vukojičić, S. & Veljić, M. (2020): New records and noteworthy data of plants, algae and fungi in SE Europe and adjacent regions, 1. *Botanica Serbica*, 44(1): 81-87.

Latinovic, N., Sabovljevic S.M., Vujicic, M., Latinovic, J., Sabovljevic, D.A. (2019): Bryophyte extracts suppress growth of plant pathogenic fungus *Botrytis cinerea*. *Botanica Serbica* (ISSN: 1821-2158). 43(1):9-12.

Latinović, N., Novaković B.S., Bogdanović, A.G., Kastratović, V., Giester, G. and Jaćimović, K.Ž. (2019): Crystal structure of dihydrazinium 1H-pyrazole-3,5-dicarboxylate, C5H12N6O4. *Zeitschrift für Kristallographie - New Crystal Structures* (1433-7266). 234(5), 957-958.

Latinović, N., Sabovljević D.A., Latinović, J., Vujičić, M. & Sabovljević S.M. (2018): Experimental approaches on biotic relationships among bryophytes and fungi in the controlled conditions. *Botanica Serbica* (ISSN: 1821-2158). Vol. 42 (supplement 1), 194-195.

Dr Svetlana Perović, redovni profesor

Posao: Prirodno-matematički fakultet, Studijska grupa za biologiju, Univerzitet Crne Gore, Džordža Vašingtona bb, 81000 Podgorica, Crna Gora.

Tel/fax: +382 20 243 816

Kuća: Jovana Tomaševića br. 11/II, 81000 Podgorica, Crna Gora

E-mail: svetlanap@ucg.ac.me; svetlanaperov@gmail.com

Mob.tel. +382 69 079 844

Rođena: 24. juna, 1973. godine, Podgorica, Crna Gora.

Akademsko zvanje:

Diplomirani biolog: Stekla na Prirodno-Matematickom fakultetu, Odsjek za Biologiju, Univerziteta Crne Gore, aprila, 1996.god.

Magistar bioloških nauka, smjer Biologija mikroorganizama, postala marta, 2001.god. na Katedri za mikrobiologiju, Instituta za botaniku i Botaničke baštne Jevremovac, Biološkog fakulteta, Univerziteta u Beogradu.

Magistarska teza: Mikrobiološki testovi za detekciju inhibitora genotoksičnog efekta zagađivača životne sredine, Mentor: Prof. Dr Draga Simić.

Doktor bioloških nauka, smjer Biologija mikroorganizama, postala decembra, 2006.god. na Katedri za mikrobiologiju, Biološkog fakulteta, Univerziteta u Beogradu.

Doktorska disertacija: Primjena integralnog pristupa i analize diverziteta bakterijskih zajednica u procjeni ekotoksikološkog stanja Skadarskog jezera. Mentor: Prof. Dr Jelena Knežević-Vukčević.

Područje istraživanja: Mikrobiologija, ekološka mikrobiologija, ekotoksikologija i zaštita životne sredine.

Naučno- istraživački rad:

Doktorat: Analize ekološkog i ekotoksikološkog stanja akvatičnih ekosistema primjenom baterije mikrobioloških testova i bio-testova na višim organizmima (Comet assay, Citotoksični test na ćelijskim linijama RTG-2 i RTL-W1, EROD test i dr) i komparativna analiza genetske raznolikosti mikroorganizama u vodi i sedimentima akvatičnog ekosistema Skadarskog jezera, primjenom klasičnih metoda i molekularno-genetičkih: izolacija DNK iz prirodnih uzoraka, sedimenata i vode, PCR tehnika, elektroforeza TTGE (Temporal Temperature Gel Electrophoresis), RFLP (Restriction Fragment Length Polymorphism), izolacija rezistentnih bakterija na živu.

Magistratura: Tema magistarske teze je iz oblasti bioaktivnih supstanci, naročita pažnja se poklanja supstancama biljnog porijekla (tanini, terpenoidi, fenoli, flavonoidi i dr.) sa inhibitornim ili modulatornim efektom na genotoksične agense i njihovoj primjeni u biomedicini i poljoprivredi.

Radno iskustvo: Od 1996. godine zaposlena na Univerzitetu Crne Gore i izvodi nastavu iz predmeta:

- Mikrobiologija, PMF, Studijska grupa za biologiju, Univerzitet Crne Gore
- Industrijska mikrobiologija, MTF, Hemiska tehnologija, Univerzitet Crne Gore
- Zaštita životne sredine, PMF, Studijska grupa Biologija, Univerzitet Crne Gore
- Biologija s humanom genetikom, Medicinski fakultet, grupa Stomatologija i Medicina
- Odabrana poglavlja iz Mikrobiologije, PMF, postdiplomske studije
- Tehnike u ekotoksikologiji, PMF, doktorske studije

Date of birth	21 st OF AUGUST 1974

WORK EXPERIENCE

Dates (from – to)	January 2020- up to now
Name and address of employer	University of Donja Gorica, Centre of Excellence for digitalization of microbial food safety risk assessment and quality parameters for accurate food authenticity certification
Type of business or sector	Management of research and networking activities
Occupation or position held	Director of the Centre of Excellence
Dates (from – to)	November 2019- up to now
Name and address of employer	E Co. Ltd., 55 Chislehurst Road, Chislehurst, BR7 5NP, United Kingdom
Type of business or sector	Project financed by UNDP: „Identification of Green Added Value Products and Feasibility Assessment of Related Value Chains”
Main activities and responsibilities	Consultant , Data collection, methodology development, analysis, reporting
Dates (from – to)	October 2013- up to now
Name and address of employer	<i>University of Donja Gorica, Faculty of Food Technology, Food Safety and Ecology (www.udg.edu.me)</i>
Type of business or sector	Teaching, research
Occupation or position held	Associate Professor
Main activities and responsibilities	Lecturing the Subjects: Control of Quality and Safety of Food products to graduate and postgraduate students; Basic Microbiology; Food Microbiology;
Dates (from – to)	January 2019- up to now
Name and address of employer	Ministry od Science Montenegro
Type of business or sector	Innovative- research project
Occupation or position held	Establishment the laboratory for innovations in food production INNOFODLAB
Main activities and responsibilities	Project Leader

Dates (from – to)	December 2018- up to now
Name and address of employer	European Agency for Food Safety (EFSA)
Type of business or sector	Research
Occupation or position held	Project Leader
Main activities and responsibilities	National Dietary Surveys in Compliance with the EU Menu methodology - "The children' survey", including subjects from 1 to 9 years old"
Dates (from – to)	November 2016- up to now
Name and address of employer	European Agency for Food Safety (EFSA)
Type of business or sector	Research
Occupation or position held	Project Leader
Main activities and responsibilities	National Dietary Surveys in Compliance with the EU Menu methodology - "The adults' survey", including subjects from 10 to 74 years old"
Dates (from – to)	April 2018- up to now
Name and address of employer	Food and Agriculture Organization of the United Nations, TCICD Division, Viale delle Terme di Caracalla, 00153, Rome, Italy
Type of business or sector	The Project I „Promoting sustainable Agri-food Value Chain s trough Linkages with Tourism,,, The Projec II „ Supporting Sustainable value Chain Integration in Montenegro's Fruit and Vegetable Sector".
Occupation or position held	Liaison Officer (National Consultant)
Dates (from – to)	April 2016- up to now
Name and address of employer	Producer Associations- Montenegro
Type of business or sector	Development o geographical indication and branding of traditional food products
Occupation or position held	Expert
Main activities and responsibilities	Elaboration of the Code of Practice (CoP) for selected products for Protection of Geographical Indications (GI), Njeguska prosciutto, Beef prosciutto, Stelja, Pljevaljski cheese, Kolasinski cheese.
Dates (from – to)	September 2016- January 2018
Name and address of employer	Instrument for Pre-Accession of the EU - IPA
Type of business or sector	The Project „ValueCheese,,
Occupation or position held	Project Leader
Main activities and responsibilities	The overall objective of the project is to transfer know-how for improved dairy production and valorisation of traditional dairy products in Montenegro, while the specific objective is to add value in cheese production in the North of Montenegro through cooperation between academic and business sector in the field of food safety, quality and product standardisation.
Dates (from – to)	February 2015- October 2017
Name and address of employer	European Commission Joint Research Centre (JRC) – Institute for Prospective Technological Studies (IPTS), Regional Rural Development Standing Working Group (SWG)
Type of business or sector	The Project: „National policy instruments and EU approximation process: effects on farm holdings in the Western Balkan countries (EUWEB).
Occupation or position held	Academic expert
Main activities and responsibilities	Preparation of the general overview of the existing policy instruments in Montenegro, analysis of the discrepancies between national agriculture and rural development policy and CAP 2014-2020 policy, contribution to the creation of the comparative cross-country harmonized database on the policy instruments and analysis of their effects on regional level, etc.
Dates (from – to)	AUGUST 2011- December 2014
Name and address of employer	The Project "Comparison of lamb carcass and meat quality of breeds in western Balkan and Norway achieving improved palatability, sale and sustainability" (ACRONYM: LAMBCAMEQU) in the frame of the HERD (High Education, Research and Development) program-Norway.
Type of business or sector	Capacity building/research
Occupation or position held	Expert
Main activities and responsibilities	Implementation of EU standards for carcass classification and estimation of the quality parameters of raw sheep/lamb. Better understanding the requirements for production of

traditionally smoked and dried sheep meat. Better valorization and fulfillment of the necessary export requirements for dried lamb meat products produced in Western Balkan (WB).

Dates (from – to)
 Name and address of employer
 Type of business or sector
 Occupation or position held
 Main activities and responsibilities

September 2014- December 2014

European Movement in Montenegro <http://www.emim.org/index.php?lang=en>
 Elaboration of the study on European Common Agricultural Policy- CAP and the current state in Montenegro

Expert

Elaboration of the study on European Common Agricultural Policy- CAP and the current state in Montenegro

Dates (from – to)
 Name and address of employer
 Type of business or sector
 Occupation or position held
 Main activities and responsibilities

December 2013- March 2014

Ministry of Agriculture and Rural development Montenegro and World Bank- "Montenegro Institutional Development and Agriculture Strengthening" (MIDAS Project)
 Elaboration of the Montenegrin Meat production and Processing Study

Expert

Elaboration of the Meat production and Processing Study for the purpose of elaboration of the Montenegrin Strategy of Agriculture and Rural Development 2014-2020.

Dates (from – to)
 Name and address of employer
 Type of business or sector
 Occupation or position held
 Main activities and responsibilities

August 2010- October 2013

FP7 AgriSciMont Project: Fostering a Science-based development of Montenegrin Agriculture.
 Biotechnical Faculty, Mihaila Lalica 1, 81000 Podgorica, Montenegro
 Consultancy, capacity building
Food Safety Expert
 Strengthening of the capacities of Biotechnical Faculty and main agricultural stakeholders in Montenegro in the area of sustainable agriculture, food safety and future development strategies.
 Conduction of trainings and production of development strategy documents- especially related to the food production industry in Montenegro- SWOT analysis and recommendations.

Dates (from – to)
 Name and address of employer
 Type of business or sector
 Occupation or position held
 Main activities and responsibilities

June 2010- May 2012

Delegation of the European Union in Montenegro, Vuka Karadzica 12, 81 000 Podgorica, Montenegro
 Capacity building, trainings
Project Coordination Local Expert „Development of Food Safety Services in Montenegro,, EU funded project
 Coordination of the project activities, trainings of main stakeholders and food producers, training of laboratory personnel

Dates (from – to)
 Name and address of employer
 Type of business or sector
 Occupation or position held
 Main activities and responsibilities

1-25th December 2011
SNV- Netherlands Development Organization

Prve proleterske brigade 5, 2nd floor, 81000 Podgorica, Montenegro

Reporting and recommendations

Local expert for Dairy Sector

Conducting of the field study and elaboration of final report: „Cheese production in Montenegro and the degree of fulfillment of food safety standards,,

Dates (from – to)
 Name and address of employer
 Type of business or sector
 Occupation or position held
 Main activities and responsibilities

2008- August 2010

health. Production of novel types of low-fat cheeses having health benefits- molecular and biochemical analyses

15th August 2008- November 2008

Aquaculture Protein Centre (APC) P.O. Box 5003 · NO-1432 Ås, Norway

Research

Research Associate

Optimization of methodology for chemical analysis of krill and fish.

April 2007- 15th August 2008

Institute of Meat Hygiene and Technology, Kacanskog 13, 11 000 Belgrade, Serbia

Director for the Development and Transfer of Technologies, Member of the Managing Board

Manage and coordinate research projects, international cooperation, decision making.
Optimization of the products from the quality and economical point.

Managing the work of three Departments within the Sector:

Department for Scientific- Technical cooperation

Department for Technical- Technological projecting and

Department for Consulting and introduction of Safety and Quality Systems

January 2005- April 2007

Institute of Meat Hygiene and Technology, Kacanskog 13, 11 000 Belgrade, Serbia

Department for Scientific and Technical Cooperation

Scientific Associate, Member of the Managing Board

Manage and coordinate research projects, international cooperation, decision making

01/12/2005- 01/03/2006

Dime Consulting- Norway, www.dime.no

Consultancy

Advisor

Collaboration between Ministry of Foreign Affairs of Norway and Ministry of Agriculture, Forestry and Water Power management, Serbia: Pre-project: " Establishing of Feed and Food safety Authority in Serbia"

2000-2005

University of Montenegro, Biotechnical institute, Podgorica, Montenegro

Department for Animal Husbandry

Research Assistant in Food microbiology

Research, product development

20/05/2002-10/08/2002

Christian Hansen, Horsholm, Denmark

Department for Genetics and Microbiology

Collaborative Researcher

Dairy microbiology and Food safety- as a part of Master thesis

05/01/2004- 30/06/2004

University of Life Sciences – Norway –UMB, Department of Chemistry, Biotechnology and Food Science, Agricultural University of Norway, Ås, Norway

Department of Chemistry, Biotechnology and Food Science

Collaborative Researcher

Dairy chemistry, cheese making technology, protection of the geographical origin of traditionally produced cheeses, sensory evaluation of dairy

products, Principal Component Analysis etc.- as a part of PhD thesis

1999-2000
 Republic Meteorological Institute, Podgorica, Montenegro
 Department for Water Microbiology
Graduate Assistant in water microbiology

EDUCATION AND TRAINING

Dates (from – to)
 Name and type of organisation providing education and training
 Principal subjects/occupational skills covered
 Title of qualification awarded

April 2017
 Norwegian University of Life Sciences, Department of Chemistry, Biotechnology and Food Science, Ås, Norway
 Food Molecular Microbiology, Food Technology

Philosophiae Doctor (Ph.D.) (second PhD degree)

Dates (from – to)
 Name and type of organisation providing education and training
 Principal subjects/occupational skills covered
 Title of qualification awarded

October 2003- September 2005
 University of Belgrade, Agricultural Faculty, Department of Industrial Microbiology, Institute of Technology and Biochemistry, Nemanjina 6, 11080 Zemun- Belgrade,
 Food Microbiology, Food safety, Food Technology

Philosopher Doctor (Ph.D.) in bioengineering- the field of Nutritional Technology Science (First PhD degree)

Dates (from – to)
 Name and type of organisation providing education and training
 Principal subjects/occupational skills covered
 Title of qualification awarded

October 2000- June 2003
 University of Belgrade, Agricultural Faculty, Department of Industrial Microbiology, Institute of Technology and Biochemistry, Nemanjina 6, 11080 Zemun- Belgrade,
 Food Microbiology, Food safety, Food Technology

Master of Science (M. Sc.) in bioengineering- the field of Nutritional Technology Science

Dates (from – to)
 Name and type of organisation providing education and training
 Principal subjects/occupational skills covered
 Title of qualification awarded

October 1994- February 1999
 Faculty of Mathematics and Natural Sciences, Department of Biology- Ecology Group, University of Montenegro, Podgorica, Montenegro
 Microbiology, Ecology

Bachelor of Sciences (B.Sc.)- Graduate Biologist

Dates (from – to)
 Name and type of organisation providing education and training
 Principal subjects/occupational skills covered
 Title of qualification awarded

July 2003
 Kornacky Food Safety Associates, LLC, Madison, Wisconsin, USA,
 Marshfield Clinic, Madison, Wisconsin, USA
 Food Safety

Training course Certificate in Food Safety Microbiology

Dates (from – to)
 Name and type of organisation providing education and training
 Principal subjects/occupational skills covered
 Title of qualification awarded

August 2003
 Texas A&M University, Poultry Science Department, College Station, Texas, USA
 Food Safety

Food Borne Pathogens and Molecular Microbiology program Certificate

Dates (from – to)	November, 2007
Title of qualification awarded	Certificate of attendance to the International Seminar on food safety ISO 22000, ISO 14001 and Integrated referent standard ISO 22001
Dates (from – to)	November, 2003
Title of qualification awarded	<i>TOEFL examinee's original score record- total score 593</i>
Dates (from – to)	December, 2003
Title of qualification awarded	GRE report of scores verbal 410, quantitative 730, analytical writing 4.0

PROFESSIONAL APPOINTMENTS

- Member of the Working Group for the negotiations of Montenegro with EU for the Chapter 12- Food Safety, Veterinary and Phytosanitary policy
- **Chair** of the Special Interest Group (SIG) Global Harmonization and of Task
 - Team (TT) Scientific Committees at the *European Federation of Food Science and Technology*- www.effost.org
- **Meeting Coordinator** for the Global Harmonization Initiative (GHI)
- **GHI Ambassador for Montenegro**- www.globalharmonization.net
- **Chair** of the Sub Group- *Hygienic design of the meat processing equipment* at the European Hygienic Engineering and Design Group (EHEDG)- www.ehedg.org
- Member of the Federation of European Microbiologists
- Member of the Montenegrin Microbiological Society
- Member of the Microbiological Society of Serbia

Honors and professional recognition

- British Council ELT Scholarship, April 2000
Federation of European Microbiologists (FEMS) Fellowship, 2001
Microbiological Society of Serbia
INCO junior grant to attend the 1st Congress of European Microbiologists, May 2003
USDA Young Scientist Program Grant, June 2003
Research Council of Norway, Fellowship, August 2003

Technical skills and competences

Competent with most Microsoft computers programs and office hardware, Unscrambler and SAS statistical program, analytical instruments.

Social skills and competences

Team work: I have worked in different research teams in several research projects.
Communication skills: (1) working close to research groups, Government bodies, professors domestically and internationally, food producers (2) lectures as the part of different training activities, presentations, etc.
Intercultural skills: I experienced successful working abroad where I worked with a team composed of colleagues of different nationalities. I am also active in participating in various international projects and multilateral activities.

Organizational skills and competences

Coordination and administration of projects and the budgets involved.
Good ability to think and work independently.
Good ability to think and work as a part of team.

Other skills and competences

Hard-working, resourceful, creative, and solution-oriented person, I was frequently able to come up with new and innovative approaches to my assigned projects and to face up the deadlines.
Ability for problem solving, intuition and perseverance
