Montenegrin Marine Biodiscovery Research – EMBRACe

Dear Dr. Djurović,

We are glad to learn about your plans to apply for Horizon 2020 Call: H2020-WIDESPREAD-2018-2020, topic: Twinning, with proposal “Montenegrin Marine Biodiscovery Research – EMBRACe”. As you know, the Center for Doctoral Studies main goals are to improve the quality of doctoral studies, to increase the international recognition of the University of Montenegro within the European Research Area and Higher Education Area, as well as to facilitate a multidisciplinary approach to doctoral studies and linking them with the economy and society.

We welcome your intention to involve early stage researchers within the framework of EMBRACe project and express our interest to jointly develop, promote and manage multidisciplinary PhD programme in marine biodiscovery at the University of Montenegro as main tool for supporting involvement of early stage researchers in marine biodiscovery in Montenegro.

We are looking forward for continuation of our successful cooperation.

Sincerely,

{Potpis}
