Na osnovu člana 64 Statuta Univerziteta Crne Gore i člana 34 Pravila doktorskih studija, Vijeće Fakulteta na XXXIX sjednici održanoj 13.11.2019.godine, donijelo je

ODLUKU

Predlažemo Centru za doktorske studije i Senatu Univerziteta Crne Gore da imenuje Komisiju za ocjenu podobnosti doktorske teze i kandidata sa nazivom "**Dinamika populacije kudravog pelikana**" kandidata mr Andreja Vizija u sastavu:

1. Dr Drago Marić, redovni profesor Prirodno-matematičkog fakulteta Univerziteta Crne Gore, mentor (naučna oblast: Ekologija, Hidrobiologija), mentor
2. Dr Jelena Rakočević, redovni profesor Prirodno-matematičkog fakulteta Univerziteta Crne Gore, (naučna oblast: Hidrobiologija) i
3. Dr Vladimir Pešić, redovni profesor Prirodno-matematičkog fakulteta Univerziteta Crne Gore, (naučna oblast: Ekologija).

Obrazloženje

Andrej Vizi podnio je Vijeću Prirodno-matematičkog fakulteta Prijavu doktorske teze pod nazivom "**Dinamika populacije kudravog pelikana**". Vijeće Prirodno-matematičkog fakulteta je shodno članu 34 Pravila doktorskih studija utvrdilo Predlog Odluke za imenovanje komisije za ocjenu podobnosti doktorske teze i kandidata.

PRIJAVA TEME DOKTORSKE DISERTACIJE

OPŠTI PODACI O DOKTORANDU	
Titula, ime i prezime	mr Andrej Vizi
Fakultet	Prirodno – matematički fakultet
Studijski program	Biologija
Broj indeksa	4/2009
Ime i prezime roditelja	Ondrej Vizi
Datum i mjesto rođenja	01.02.1980., Titograd
Adresa prebivališta	Arhonta Petra bb, Podgorica
Telefon	020 260 088, 069 239 959
E-mail	avizi@t-com.me

NASLOV PREDLOŽENE TEME	
Na službenom jeziku	Dinamika populacije kudravog pelikana (<i>Pelecanus crispus</i> Bruch, 1832) na Skadarskom jezeru u funkciji lokalnih i regionalnih ekoloških faktora
Na engleskom jeziku	Dalmatian pelican (<i>Pelecanus crispus</i> Bruch, 1832) population dynamics on Skadar Lake in the function of local and regional ecological factors
Obrazloženje teme	
<p>1. Obrazloženje naziva teme</p> <p>Kolonija kudravog pelikana (<i>Pelecanus crispus</i> Bruch, 1832) na Skadarskom jezeru je jedno od najstarijih zabilježenih gnjezdilišta ove vrste na svijetu, opisana još krajem 19. vijeka. Kudravi pelikan je izrazito filopatrična i stenovalentna akvatična ptica, čija kolonija bilježi najduži kontinuitet upravo na Skadarskom jezeru. Tokom perioda od 120 godina, zabilježene su intenzivne promjene u brojnosti populacije, od istorijskog maksimuma od 50 parova, pa do potpunog prestanka gniježđenja tokom 1990-tih godina. Od početka 2000-tih, dolazi do njihovog djelimičnog oporavka. Do 2013. godine su istraživanja biologije pelikana uglavnom obavljana intermitentno zbog nestalne lokacije kolonije i čestih prekida reproduktivne sezone. Nakon izgradnje vještačkih platformi, od 2014. do danas je prisutan pozitivan trend rasta populacije. Smatramo da do sada zabilježene fluktuacije u brojnosti populacije nijesu posljedica samo lokalnih faktora, već i odraz dinamike populacije na širem prostoru Crne Gore, Albanije i Grčke, koji predstavlja posebnu meta-populaciju u okviru areala vrste. Dinamika populacije na Skadarskom jezeru je stoga u funkciji adaptivne vrijednosti vrste na nivou meta-populacije, ali je takođe uslovljena i lokalnim resursima.</p> <p>2. Predmet istraživanja:</p> <p>Predmet istraživanja u širem smislu je reproduktivna dinamika kudravog pelikana na Skadarskom jezeru u kontekstu ekoloških i antropogenih faktora. Konkretni predmet istraživanja su pokazatelji razvoja populacije: ukupan broj jedinki, broj gnijezdećih parova, broj gnijezda i broj uspješno odgajenih mладунaca. Značajni pokazatelji su i intenzitet antropogenih faktora, odnos adulta i nezrelih jedinki, fekunditet i mortalitet, prostorna distribucija na jezeru u toku godine, vrsta i porijeklo supstrata, vodostaj, temperatura vode i vazduha, prisustvo oportunističkih komensala i predatora, diurnalna dinamika, antropogeni pritisci, ishrana. Na regionalnom nivou, odnosno arealu zapadne meta-populacije, predmet istraživanja su literaturni izvori i post-nidifikaciona</p>	

disperzija mladih jedinki u kontekstu preživljavanja i filopatrije u okviru aktuelnog projekta.

3. Aktuelnost teme:

Redovnim monitoringom koji je kandidat obavljao u periodu 2012-2018, utvrđen je značajan rast populacije pelikana na Skadarskom jezeru. Aktuelna brojnost populacije na Skadarskom jezeru, kako u pogledu individua, tako i u pogledu uspješno odgajenih mладунaca, u 2017. godini je premašila istorijski poznati maksimum od 50 parova.

Zbog toga su aktuelizovani: 1) problem kapaciteta Skadarskog jezera u pogledu ekoloških resursa za ovu vrstu, 2) prirodna održivost kolonije nasuprot vještačkoj održivosti, 3) pitanje uzroka rasta populacije, 4) pitanje interspecijskih efekata i ekološke ravnoteže na Skadarskom jezeru, uključujući i antropogeni faktor.

Pregled istraživanja

Kudravi pelikan (*Pelecanus crispus*) je vrsta prvi put opisana u Dalmaciji bez detaljnijeg opisa lokacije porijekla holotipa (Bruch 1832). Prema raspoloživim podacima (Stumberger, 2006), vrsta je opisana na osnovu serije primjeraka iz nekoliko prirodnjačkih zbirk, pri čemu nije isključeno da pojedini primjeri vode porijeklo i sa Skadarskog jezera. Međutim, vjerovatnija je teza da navedeni primjeri potiču iz delte Neretva, gdje je kudravi pelikan bio prisutan tokom 19. vijeka. Danas je Skadarsko jezero granična tačka zapadnog reproduktivnog areala. Prve opise kolonije na Skadarskom jezeru nalazimo u radovima sa kraja 19. vijeka (Brusina, Fuehrer, Reiser), koji identifikuju kudravog pelikana i navode brojnost od 50-300 parova (Brusina, 1891), (Reiser, Othmar & Fuhrer, 1896)). Takođe, u literaturi se navodi i postojanje kolonije pelikana na Zogajskom blatu kod Ulcinja (Reiser, Othmar & Fuhrer, 1896), koje je tokom 1950-tih godina pretvoreno u solanu. Prisustvo pelikana na Skadarskom jezeru potvrđuje više putopisaca tokom 19. vijeka (Vizi, O, 1980). Međutim, značajniji uvid u biologiju ove vrste na Skadarskom jezeru stičemo tek krajem 20. vijeka, kada su obavljena moderna istraživanja biologije pelikana (Vizi, O. 1977, 1981, 1984, 1987, 1991). Utvrđeno je da parametri populacije kudravog pelikana na Skadarskom jezeru znatno fluktuiraju, kao i broj i lokacije kolonija. Takođe, isti autor je istraživao i ishranu pelikana i uticaj na ihtiofaunu jezera. Utvrđeno je da je opstanak populacije neizvjestan zbog prirodnih i antropoloških pritisaka, i potvrđen je globalni status kudravog pelikana kao ugrožene vrste (Crivelli & Vizi, 1981). Tokom posljednje decenije 20-tog vijek a, brojnost pelikana je drastično opala, i na osnovu neredovnih istraživanja nije bilo dokaza o postojanju gnijezda. Ovaj period se vezuje za pojačano uznemiravanje u graničnoj zoni prema Albaniji kao posljedice nelegalne trgovine i krijumčarenja. Nakon 2000-te godine, u saradnji Prirodnjačkog muzeja i NP Skadarsko jezero obnovljena su istraživanja, kada su utvrđeni novi pokušaji gnijezđenja na prirodnim ostrvcima. Oporavak reproduktivne populacije se nastavio tokom prve decenije novog milenijuma, sa čestim gubicima uslijed poplava i uznemiravanja (Saveljić et al 2004, Vešović-Dubak & Vizi, O., 2004-2008). Konačno, najnoviji period istraživanja se vezuje za nagli oporavak populacije nakon sproveđenja mjera zaštite, čime je kudravi pelikan postao „menadžment- zavisna vrsta“, odnosno vrsta čiji reproduktivni uspjeh zavisi od ljudske intervencije. U ovom periodu (2014-2018) je obavljan redovan mjesečni monitoring populacije i prikupljeni su novi podaci o biologiji pelikana Skadarskom jezeru.

Cilj i hipoteze

4. Glavna hipoteza: Dinamika populacije kudravog pelikana na Skadarskom jezeru je indikator lokalnih i regionalnih ekoloških procesa

Obrazloženje: U poređenju sa drugim staništima u okviru reproduktivnog areala, na Skadarskom jezeru gnijezdi relativno mali broj jedinki. Ova činjenica ukazuje na postojanje fundamentalnih razlika u kvalitetu staništa, antropogenim pritiscima i ekološkim resursima. Ekološki resursi, tj. kapaciteti Skadarskog jezera nijesu dovoljno ispitani sa aspekta razvoja populacije kudravog

interspecijskih odnosa pelikana na Skadarskom jezeru. sakupljanje podataka o lokacijama, porijeklu i fizičkim osobinama gnjezdilišta radi utvrđivanja odnosa sa reproduktivnim uspjehom. Takođe, potrebno je utvrditi i sukcesivnost mikrolokacija u kontekstu njihove trajnosti i filopatričnosti. Naročito je važna analiza korišćenja prirodnih mikrolokacija (tresetna ostrva) u odnosu na vještačke platforme za gniježđenje.

Cilj istraživanja je utvrđivanje dinamike populacije kudravog pelikana na Skadarskom jezeru u kontekstu resursa i kapaciteta jezera u odnosu na njihovu potencijalnu populaciju.

Materijali, metode i plan istraživanja

Materijali i oprema:

Transport: Plastični motorni čamac plitkog gaza, dužine 6m. Jedini adekvatan način za istraživanje pelikana na njihovom reproduktivnom biotopu (litoral sjeverne obale) je pomoću plovila. Konfiguracija terena, vegetacija i udaljenost pogodnih kota onemogućava osmatranje sa obale.

Osmatranje i fotografisanje: Dvogledi uvećanja 10-15x, teleskop uvećanja 70-90x, digitalni SLR aparat sa teleobjektivom 400-800mm. Optička oprema je neophodna za razlikovanje detalja uzrasta, kao i za očitavanje markacija i prstenova. Dokumentarna fotografija je dodatni izvor informacija za kabinetски rad.

Mjerni instrumenti: Ručni GPS sa kartografijom rezolucije 5m, digitalni termometar za mjerjenje temperature vode i vazduha, ručni anemometar za mjerjenje pravca i intenziteta vjetra.

Ostalo: Terenska bilježnica/protokol, vrećice za uzorkovanje, mapa, baterije, sitni pribor, PC, softver za mapiranje i obradu podataka, itd.

Metode:

Istraživanje obuhvata terenski i kabinetski rad na prikupljanju i analizi podataka. Kabinetski rad podrazumijeva istraživanje literature, unos i obradu podataka sa terena, analizu i izradu materijala. Terenski rad podrazumijeva prikupljanje podataka sa terena se prema utvrđenom protokolu, odnosno planu istraživanja. Podaci o broju, životnoj fazi, eventualnim markacijama i ponašanju pelikana se dobijaju vizuelnim osmatranjem pomoću dvogleda i teleskopa. Lokacije relevantnih nalaza se mjere pomoću ručnog GPS-a. Meteorološki i hidrološki podaci i vodostaj se mjere odgovarajućim termometrima i anemometrom, kao i pomoću baždarene mjerne letve. Uzoreci ishrane, pera, jaja, ostataka životne aktivnosti drugih vrsta se sakupljaju ručno i čuvaju u odgovarajućim uslovima (4% formalin, papirne vrećice, tegle i sl.). Osim toga, za praćenje diurnalne dinamike i ponašanja je korišćena web kamera montirana na koloniji.

Plan istraživanja:

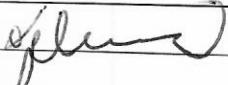

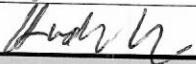

Plan istraživanja definiše standardni protokol monitoringa populacije pelikana na Skadarskom jezeru sa površine vode. Aktivnosti tokom monitoringa su usaglašene sa zaključcima Međunarodnog programa za zaštitu pelikana (Crivelli, 1996) i Akcionim planom za zaštitu pelikana u CG sa ciljem da se utvrdi ukupna populacija kudravog pelikana, veličina gnjezdilišne populacije i reproduktivni uspjeh. Područje istraživanja je definisano na osnovu postojećih znanja o ekologiji kudravog pelikana na Skadarskom jezeru (Vizi, O., 1974, 1981, 1992...) i obuhvata sjeverni dio tzv. Veljeg blata, koji uključuje litoral sa akvatičnom vegetacijom i zonu otvorene vode do granice vidljivosti. Podijeljeno je na tri profila (istraživačke jedinice) radi efikasnije orientacije i upisivanja podataka. Prva jedinica obuhvata pojas od ušća Morače na zapadu do kanala Jendek na istoku; druga jedinica obuhvata područje rezervata Crni žar na jugu

УНИВЕРЗИТЕТ ЦРНЕ ГОРЕ
САНДУЧА ЈУРЕ
1019
Подгорица, 29.04.2010. год

Ref:
Date:

На основу члана 75 став 2 Закона о високом образovanju (Sl. list RCG br. 60/03) и члана 18 Statuta Univerziteta Crne Gore, Senat Univerziteta Crne Gore, na sjednici održanoj 29.04.2010. godine, donio je

ODLUKU O IZBORU U ZVANJE

Dr DRAGO MARIĆ bira se u akademsko zvanje redovni profesor Univerziteta Crne Gore za predmete: Evolucija, Biogeografija i Metode u ekološkim istraživanjima na Prirodno-matematičkom fakultetu.

REKTOR

Prof.dr Predrag Miranović

CURRICULUM VITAE

Of Full Professor Dr Drago S. Marić

DATE AND PLACE OF BIRTH

October 10th, 1954 in Bosansko Grahovo (Bosna and Hercegovina).

ADDRESS

Faculty of Sciences, G. Washington Street, PoBox 5455. Tel./Fax: ++ 381/81/243-816;
E-mail: dragomrc@yahoo.com

NATIONALITY

Montenegro

EDUCATION

1. High School (Gymnasium) in Bosansko Grahovo.
2. Faculty of Sciences (Biology), Sarajevo, 1973.
3. Postgraduate studies and Master Degree, Faculty of Sciences, Novi Sad, 1994.
4. Doctor Scienciae, Faculty of Sciences Kragujevac, 1998.

OFFICIAL INTERNATIONAL SCIENTIFIC MISSIONS

USA

- Auburn University, Faculty of Agriculture -1986

France

- Universite des Sciences et Techniques du Languedoc, Montpellier -2003.
- Universite de Provence, Laboratorie de hydrobiologie. Marseille-2001, 2002, 2003.

Germany

- Bundesforschungsanstalt fur fischerei (BFA), Hamburg, 1982, 1983, 1985.
- University of Heidelberg, Department of Zoology, 2002

Greece

- University of Thessaloniki, Greece – 2000
- University of Ioannina, Department Messolonghi, 2008

KNOWLEDGE OF LANGUAGES

1. English (speak, read,)
2. Russian (read, speak and write slightly)

EMPLOYEMENT RECORD

1978.- assistant at the Institute of Medical and Biological Research (IBMI), Podgorica, Montenegro

1984.- senior assistant at IBMI, Podgorica, Montenegro

1993.- senior assistant at the University of Montenegro, Podgorica, (Faculty of Sciences).

1998.- Assistant Professor at the University of Montenegro, Podgorica, (Faculty of Sciences).

1998 - 2003. - Head, Department of Biology, Faculty of Sciences, Podgorica, Montenegro

2004. Associated Professor at the University of Montenegro, Podgorica, (Faculty of Sciences).

2010. Full Professor at the University of Montenegro, Podgorica, (Faculty of Sciences).

ENGAGEMENTS IN THE SCIENTIFIC PROJECTS

In the last 10 years, engaged as follows.

1. as assistant - 2 projects (2 international - cooperation with Germany).

2. as assistant - 1 projects (international - cooperation with France).
 3. as assistant - 2 projects (international - cooperation with Greece)
- The main topics of projects: fish biology and ecology, Aquaculture, living resources and its protection.

MEMBERSHIPS IN THE SCIENTIFIC ASSOCIATIONS

International:

1. European Ichthyological Union (EIU)
- 2.

OTHER ACTIVITIES

Committee for Flora and Fauna (Montenegrin Academy of Sciences)

Committee for Encyclopedia Montenegrina (Montenegrin Academy of Sciences)

National Committee for Biological safety, Federal Government

PUBLICATIONS -major publications

Doctoral thesis

Adaptacija introdukovanih srebrnog karaša (*Carassius auratus gibelio* Bloch, 1783.) u Skadarskom jezeru [Adaptation of Introduced German Carp (*Carassius auratus gibelio* Bloch, 1783) in Skadar Lake]. Doktorska disertacija, pp 268. Kragujevac, 1998.

Papers

University textbooks

Marić, D., Rakočević, J. Hydrobiology. University of Montenegro. 352 p.

Participated in scientific research projects (=fishery-ichthyology)

1. "Limnološka istraživanja akumulacionog jezera Piva" [„Limnology studi artifical Lake Piva”] (1976-1980).
2. "Proučavanje mogunosti razvoja ribarstva u akumulacijama Krupac i Slano i njihovom užem slivnom području" [“The study possibilities of development of fisheries in reservoirs Slano and Krupac and their narrow catchment area”] (1978-1980).
3. "Izučavanje mogunosti razvoja i unapredjenja ribolova na Skadarskom jezeru" [“Studying the possibilities of development and improvement of fishing on Lake Skadar”] (1977-1980).
4. Hematološka i parazitološka istraživanja riba Skadarskog jezera i Bokokotorskog zaliva kao značajnih parametara za zaštitu životne sredine i "akvakulturu" [“Hematological and parasitological studies of fish Skadar Lake and the Bay of Kotor as important parameters for environmental protection and aquaculture”] International Project, Medjunarodni projekat, Univerzitet u Hamburgu. (1979-1983).
5. "Hidrobiološke karakteristike rijeke Morače i njenog sliva" [“Hydrobiological characteristic of the drainage basin of Morača”] (1980-1983).
6. "Hidrobiološka, antropološka i genetička istraživanja u basenu Skadarskog jezera i problemi njegove zaštite" [“Hydrobiological, anthropological and genetic studies in the basin of Lake Skadar and the problems of its protection”] (1982-1984).
7. "Biološka proučavanja rijeke Tare s posebnim osvrtom na mogunosti prirodnog i industrijskog zagadjenja" [“Biological studies of Tara, with special emphasis on the possibilities of natural and industrial pollution”] (1981-1985).
8. "Biološka i ekomska valorizacija hidroakumulacija i njihovog slivnog područja u Crnoj Gori" [“Biological and economic evaluation of hydro reservoirs and their catchment areas in Montenegro”] (1981-1985).
9. "Iskorišćavanje prirodnih potencijala Skadarskog jezera kao izvora hrane i vode za piće i problemi zagadjenja i zaštite" [“The exploitation of natural resources of Lake Skadar as a source of food and drinking water and pollution problems and protect”] (1981-1985).
10. "Biološka i hemijska proučavanja voda sliva Čehotine s posebnim osvrtom na akumulaciju "Otilovići" u uslovima regionalne industrijalizacije" [“Biological and chemical studies of water catchment Čehotine with special emphasis on the accumulation of" Otilovici "in terms of regional industrialization”] (1983-1987).
11. "Mogunosti razvoja akvakulture na Skadarskom jezeru" [„Possibilities of aquaculture development in the Skadar Lake”] (1984-1987). (Međunarodni projekat, USA-Univerzitet u Auburnu). International Project, University of Auburn).
12. "Hidrobiološka proučavanja životnih zajednica i hidrohemijska istraživanja rijeke Tare i njenih pritoka" [“Hydrobiological study of living communities and hydrochemical studies of the Tara River and its tributaries”] (1987-1990).
13. "Integralni sistem za kaveznu proizvodnju salmonidnih riba" [“Integrated cage system for breeding salmonid fish”] (1990-1994).
14. "Biološka proučavanja u slivu rijeke Morače" [“Biological studies in the basin of the river Moraca”] (1990-1994).

15. "Istraživanja prirodnih karakteristika bazena Skadarskog jezera, u cilju njegove zaštite unapredjenja i racionalnog iskoriščavanja" ["Studies on the natural characteristics of the Skadar Lake basin, in order to improvement its protection and rational utilization"] (1991-1994).
16. Praćenje endemičnih, rijetkih i ugroženih vrsta riba u slivu Skadarskog jezere u cilju zaštite biodiverziteta i genofondova Nacionalnog parka ["Monitoring the endemic, rare and endangered fish species in the basin of Lake Skadar to protect biodiversity and gene pool of the National Park"] (1996-1998).
17. Integrated Monitoring of Skadar Lake/Lake Shkoder (2000-2003), International Project, međunarodni projekat u saradnji sa Univerzitet u Haidelbergu i Univerzitet u Skadru.
18. Connaissance de la Biodiversité Ichthyque Endémique du système Ohrid-Drim-Lac Skadar 2001-2003) International Project, saradnja sa Francuskom i Albanijom (Međunarodni projekat).
19. "EULIMNOS – Integrated Monitoring of Skadar Lake" (HRK-the project leader institution) <http://www.eulimnos.org> (2002-2004) International Project.
20. "Comparative study of fish parasites biodiversity from Kavala (Aegean sea), Messolonghi bay (Ionian sea) and coast of Montenegro (Adriatic Sea). (2006-2008) International Project, saradnja sa Grčkom, međunarodni projekat -"Uporedna istraživanja biodiverziteta parazita riba sa područja Kavale (Egejsko more), zaliva Messolonghi (Jonsko more) i crnogorskog primorja (Jadransko more)".
21. "Fauna Crne Gore- katalog slatkovodnih riba Crne Gore"["Catalogue of freshwater fishes of Montenegro"] (2007-2008).
22. " Istraživanja bioindikatora kontinentalnog akvatorijuma Crne Gore" ["Studies on bio-indicators of continental aquatorium of Montenegro"] (2007-2010).
23. Fauna Crne Gore: 'Katalog slatkovodnih riba Crne Gore [Fauna of Montenegro- "Catalogue of freshwater fishes of Montenegro"] (2008-2009).
24. Crna Gora u XXI stoljeću-u eri kopetitivnosti: Projekat- Životna sredina i održivi razvoj (Rukovodilac M. Burić), Biodiverzitet ["Montenegro in the 21st century - the era of competitiveness: Environment and Sustainable Development, Biodiversity"]. Montenegrin Academy of Science and Art (2009-2010).
25. "Fauna Crne Gore- Fauna slatkovodnih riba Crne Gore" ["Fauna of Montenegro- Freshwater fish fauna of Montenegro"] (2010-2011).
26. Monitoring Biodiverziteta u Crnoj Gori za 2012 . Prirodnački muzej Crne Gore – Agencija za zaštitu životne sredine (2013) ["Monitoring biodiversity of Montenegro for 2012."].

Scientific and technical expertise (fishery-ichthyology)

1. „Stanje ribljeg fonda akumulacije Krupac na koti 12“ ["State of fish stocks Krupac reservoir at elevation 612"] (1979).
2. "Mogućnost razvoja ribarstva u vodama Nikšića ["Possibility of Development of Fisheries in water of Nikšić"] (HE "Peruica" - Nikšić, 1981).
3. "Ribarska osnova za vode NP "Durmitor" ["Possibility of Development of Fisheries (Fisheries assessment) in waters of the NP"Durmitor"]] Zabljak (1982).
4. "Hemski i biološki kvalitet voda rijeke Čehotine i nekih njenih pritoka" TE "Pljevlja" ["Chemical and biological quality of rivers Čehotina and some of its tributaries"Pljevlja"] (1981-1982).
5. "Ribarska osnova sa analizom hemijskog i biološkog kvaliteta voda rijeke Čehotine i njenih pritoka" ["Fisheries assessment with the analysis of chemical and biological water quality of the river and its tributaries Čehotine"] (SO Pljevlja, 1983).
6. "Program studijskih istraživanja i idejnih rješenja HE "Tara" (profil Tepeca) - polazna studija, tema: "Neke biološke karakteristike životnih zajednica" ["The program of study and research of general solutions HE" Tara "(profile Tepeca) - initial studies, the topic:" Some biological characteristics of living communities "] (1985).

7. "Studija životnih zajednica i životnih uslova sliva rijeke Morače u svijetlu izgradnje novog izvora električne energije na rijeci Morači" ["The study of living communities and living conditions of the river Moraca in the light of building a new power source on the river Moraca"] (1985).
8. "Kompleksno stanje vodotoka i obalnog područja nizvodno od brane HE "Piva" do akumulacije HE "Baina Bašta" ["A complex state of watercourses and coastal areas downstream of the dam, " Beers "the accumulation of HPP Bain Garden"] (1978-1986).
9. "Program zaštite, unapredjenja i razvoja prirodnih bogatstava i dobara NP "Skadarsko jezero". Bazna studija-ichtiofauna ["Program protection, improvement and development of natural resources and potential of NP Skadar Lake. " Base Study-ichthyofauna"] (1987).

Manager and principal investigator= head and chief researcher

1. "Ribarska osnova Pivskog jezera sa pritokama" [" Possibility of Development of Fisheries (Fisheries basis, fisheries assessment) of Piva Lake and its tributaries"] (1995).
2. "Ribarska osnova sliva rijeke Tare i jezera NP "Durmitor" [" Possibility of Development of Fisheries (Fisheries assessment) in River Tara Watershed and Lakes of NP "Durmitor"] (1996).
3. "Mogućnost razvoja ribarstva u vodama Nikšića (jezera Krupac, Slano, Liverovići i rijeka zeta)" [„Possibility of Development of Fisheries (Fisheries assessment) in water of Nikšić“ (Lakes Krupac, Slano, Liverovići and river Zeta)] (2003).
4. "Formiranje salmonidnih reprocentara za proizvodnju mlađa autohtonih ribljih vrsta" [”Establishment of centers for the reproduction and production of fry of native species of salmonids“] 2003-2005.
5. " Ribarska osnova eliva rijeke Morače" [".Possibility of Development of Fisheries (Fisheries assessment) in River Morača Watershed"] (2004).
6. "Ribarska osnova rijeke Lim i njenog slivnog područja" [“Possibility of Development of Fisheries (Fisheries assessment) in River Lim Watershed”] (2006).
7. "Biološko-ekološka istraživanja endemičnih i ugroženih vrsta salmonida u vodama Crne Gore" [“Biological and ecological studies of endemic and endangered salmonids in the waters of Montenegro”] (2005-2007).
8. "Ribarska osnova sliva rijeke Čehotine" [”Possibility of Development of Fisheries (Fisheries assessment) in River Čehotina Watershed“} (2007).
9. "Ribarska osnova sliva Pivskog jezera" [”Possibility of Development of Fisheries (Fisheries assessment) in Piva Lake Watershed”] (2008-2009).

6. "Program studijskih istraživanja i idejnih rješenja HE "Tara" (profil Tepca) - polazna studija, tema: "Neke biološke karakteristike životnih zajednica" (1985).
7. "Studija životnih zajednica i životnih uslova sliva rijeke Morače u svjetlu izgradnje novog izvora električne energije na rijeci Morači" (1985).
8. "Kompleksno stanje vodotoka i obalnog područja nizvodno od brane HE "Piva" do akumulacije HE "Baina Bašta" (1978-1986).
9. "Program zaštite, unapredjenja i razvoja prirodnih bogatstava i dobara NP "Skadarsko jezero". Bazna studija-ihtiofauna (1987).

Rukovodilac i istraživač u studijama i ekspertizama

01. "Ribarska osnova Pivskog jezera sa pritokama" (1995).
02. "Ribarska osnova sliva rijeke Tare i jezera NP "Durnitor" (1996).
03. "Ribarska osnova voda nikšikog regiona (jezera Krupac, Slano, Liverovići i rijeka Zeta) (2003).
04. Formiranje salmonidnih reprocentara za proizvodnju mlađa autohtonih ribljih vrsta (2003).
05. "Ribarska osnova sliva rijeke Morača (rijeka Morača, Cijevna i Zeta)" (2004).
06. "Ribarska osnova sliva rijeke Lim (sa Plavskim jezerom i pritokama)" (2006).
07. "Biološko-ekološka istraživanja endemičnih i ugroženih vrsta salmonida u vodama Crne Gore" (2005-2007).
08. "Ribarska osnova sliva rijeke Čehotine" (2007).
09. "Ribarska osnova sliva rijeke Pive" (2008-2009).
10. "Ribarska osnova za područje opštine Nikšić" (2013).
11. „Rinarska osnova za sлив горњег тока ријеке Таре (општина Колашин и Мокројевачки)“ (2014)

Druge stručne aktivnosti:

- Davanje mišljenja i predloga vezanih za ribolov i ribarstvo u Crnoj Gori,
- Davanje mišljenja o zaštiti vodenih ekosistema,
- Učestvovao na izradi zakona o slatkovodnom ribarstvu
- Stručni konsultant kod Ministarstva poljoprivrede, šumarstva i vodoprivrede, Zavoda za zaštitu prirode, JP Nacionalni park "Skadarsko jezero" po pitanjima ribarstva i zaštite životne sredine,
- Stručni saradnik na izradi Crnogorskog rječnika, CANU,
- Izrada tehničko-tehnoloških projekata za uzgoj pastrmki, šaranskih i morskih vrsta riba,
- Predsjednik komisija za utvrđivanje ispunjenosti uslova ribnjaka za komercijalni rad,
- Radio na izradi više projektnih zadataka vezanih za iskorišćavanje prirodnih resursa.
- Bio Predsjednik ili član komisija za ocjenu projekata za izdavanje koncesija,
- Predsjednik ili član komisija za ocjenu planova i porograma u ribarstvu,
- Izrada (član ekipa) elaborata o uticaju na životnu sredinu i sl.
- Član komisije za ocjenu opravdanosti izgradnje hidroelektrane „Buk Bijela“ – 2004.
- Član većeg broja komisija za ocjenu studija o uticaju na životnu sredinu.
- Ekspert – konsultant na Projektu: EAR Project in Montenegro 05mon02: Suport to the Fishery Sector (2007/08)
- Član stručnog tima za izradu prostornog plana crne Gore,
- Član Odbora za faunu i floru CANU 1998-)
- Član redakcije časopisa "Natura Montenegrina" (2001 -)
- Član naučnih i organizacionih odbora međunarodnih i domaćih simpozijuma i kongresa,
- Recenzent u više naučnih radova u domaćim i međunarodnim časopisima
- Član naučnog savjeta JU NP Crne Gore (2007 -)
- Saradnik u više naučno-popularnih časopisa.
- Član komisije za ocjenu Studija o procjeni uticaja na životnu sredinu za izgradnju hidroelektrana „Buk Bijela“ i „Foča“ na rijeci Drini republika Srpska i hidroelektrana „Brodarevo 1“ i „Brodarevo 2“ na rijeci Limu republika Srbija -2013. godina.
- Član stručne equipe za izradu studije strateška procjena uticaja na životnu sredinu DSL "Mihailovići" – Skadarsko jezero
- Rukovodio ili član ekspertske ekipa za utvrđivanje „nultog stanja vodenih ekosistema“,
- Rukovodio ili član ekspertske ekipa za monitoring na vodenim ekosistemima,
- Član komisije za inoviranje planova i programa na Studijskoj grupi za biologiju (bečelor, specijalističke, master i doktorske studije) po novom „Bolonjsko“ programu.
- Član komisije za akreditaciju postdiplomskih specijalističkih studija Zaštita životne sredine na metalurško-tehnološkom fakultetu u Podgorici.
- Profesor, nastavnik, na osnovnim, specijalističkim i doktorskim stunijama na PMF, univerzitet Crne Gore,
- Profesor, nastavnik, na PF, Univerzitet Crne Gore (predmet Ribarstvo),
- Mentor, diplomcima, postdiplomcima i doktorandima,
- Predsjednik ili član u komisijama za odbranu diplomskih, specijalističkih i doktorskih radova (teza),
- Recezent - udžbenika i knjiga,
- Recezent pri izboru zvavnja za nastavnike i stručna i naučna zvanja,
- Predsjednik ili član komisija za polaganje stručnih i državnih ispita (u nastavi i nauci),
- Intervjuji i naučna mišljenja u sredstvima javog informisanja (radio, TV i štampani mediji)
- Zvanični sudski vještak iz oblasti biologije (2008 -)

CURRICULUM VITAE

EUROPEAN FORMAT

PERSONAL INFORMATION

Name, Surname	Vladimir, Pešić
Address House number, street name, postcode, city, country	Faculty of Natural Sciences and Mathematics, Department of Biology, University of Montenegro, Džordža Vašingtona bb, 81000 Podgorica, Montenegro
Telephone	+382 67 236 351
Fax	+382 20 244 608
E-mail	vladopesic@gmail.com
Website	http://www.ucg.ac.me/objava/blog/17454/objava/1-biografija-pesic-vladimir https://www.researchgate.net/profile/Vladimir_Pesic
Place and Date of birth	Podgorica, 06.09.1973

WORK EXPERIENCE

/Dates (from - to)	06.06.1973 1980-1988 1988-2002 2003-2008	Born in Podgorica, Montenegro. Primary school in Podgorica Gymnasium "Slobodan Škerović" in Podgorica Undergraduate studies from general biology at the Department of Biology, University of Montenegro
Add separate entries for each relevant post occupied, starting with the most recent.]	1998-2003 2001 2003 2004-2008	Work as Assistant at Department of Biology of the University of Montenegro in Podgorica Master thesis at the Faculty of Biology of the University of Belgrade, Serbia PhD thesis at the Faculty of Biology of the University of Belgrade, Serbia: "Taxonomical, ecological and zoogeographical study on water mites of the central part of Balkan Peninsula" Work as Assistant Professor at Department of Biology of the University of Montenegro at the academic courses: "Zoology of

		Invertebrates" and "Ecology of Animals" and master courses: "Conservation Biology", "Principles of Sustainable Development" and "Crenobiology and Ecology of Groundwater".
2009 –2013		Work as Associate Professor at Department of Biology of the University of Montenegro
2007 – 2013 Since 2013 – Cont.		Head of Department of Biology of the University of Montenegro Work as Full Professor at Department of Biology of the University of Montenegro
2014– 2017		President of Scientific Board of University of Montenegro
Name and address of employer	University of Montenegro	
Type of business or sector	Public	
Occupation or position held	Full Professor	

EDUCATION AND TRAINING

Dates (from – to) Add separate entries for each relevant course you have completed, starting with the most recent.	2003	PhD thesis at the Faculty of Biology of the University of Belgrade, Serbia
	2001	Master thesis at the Faculty of Biology of the University of Belgrade, Serbia
	2003-2008	Undergraduate studies from general biology at the Department of Biology, University of Montenegro
Name and type of organisation providing education and training	University of Belgrade	
Principal subjects occupational skills covered	Ecology and Biodiversity Research	
Title of qualification awarded / Level in National classification	PhD Level VIII	

RESEARCH ACTIVITIES

Research sectors	There are four avenues of research in which I am mainly interested and which are partly interlinked: 1 Biodiversity, ecology, taxonomy and zoogeography of aquatic invertebrates, with special regard to water mites (Hydrachnidia) and freshwater gastropods; 2 Ecological research in springs ecosystem; 3 Ecology of Intermittent Rivers and Ephemeral Streams. 4 Environmental Monitoring
------------------	---

Recent Scientific Activities.

I described more than 300 species new for science from all parts of the world.

O D L U K U O IZBORU U ZVANIJE

Dr JELENA RAKOČEVIĆ bira se u akademsko zvanje redovni profesor Univerziteta Crne Gore za oblast Botanika (Sistematika algi, osnovne studije, studijski program Biologija, Sistematika gljiva i lišajeva, osnovne studije studijski program Biologija) i oblast Ekologija (Hidrobiologija osnovne studije, studijski program Biologija, Biocenologija, master studije, studijski program Biologija) na Prirodno-matematičkom fakultetu Univerziteta Crne Gore, na neodređeno vrijeme.

SENAT UNIVERZITETA CRNE GORE
PREDSEDJEDNIK

Prof.dr Danilo Nikolić, rektor

BIOGRAFIJA

IME I PREZIME: JELENA RAKOČEVIĆ

Rođena sam 20.04.1974. godine u Podgorici, gdje sam završila osnovnu školu i gimnaziju sa odličnim uspjehom i dobila nagrade "Luča".

Školske 1992/93 godine upisala sam studije Biologije na Prirodno-matematičkom fakultetu u Podgorici, gdje sam diplomirala 6. 11. 1996. godine sa prosječnom ocjenom 9,66 i stekla zvanje diplomirani biolog.

Poslijediplomske studije upisala sam školske 1996/97. godine na Biološkom fakultetu Univerziteta u Beogradu (smjer: Hidrobiologija) i završila ih sa prosječnom ocjenom 10. Magistarsku tezu pod nazivom: "Epifitske silikatne alge Skadarskog jezera" odbranila sam 21. 06. 2000. godine (pod mentorstvom prof.dr. Jelene Blaženčić) i stekla zvanje magistra bioloških nauka.

Doktorsku disertaciju pod nazivom: "Ekološka i taksonomska studija fitoplanktona Skadarskog jezera", odbranila sam 1. 12. 2006. godine, na Biološkom fakultetu Univerziteta u Beogradu (pod mentorstvom prof.dr. Mirka Cvijana) i stekla zvanje doktora bioloških nauka.

Usavršavala sam se iz oblasti hidrobiologije realizujući kraće studijske boravke u Njemačkoj: u laboratorijama za akvatičnu efologiju i ekotoksikologiju na Univerzitetu u Heidelbergu, na Medicinskom institutu, Univerziteta u Hajdelbergu, potom i na BASF-u (Center for Agricultural Research) u Limburgerhofu, kao i u Austriji, na Karl Frazens Univezitetu u Gracu.

Do sada sam učestvovala u većem broju međunarodnih i nacionalnih projekata i izradi više naučno-stručnih studija i ekspertiza i participirala na više međunarodnih i nacionalnih simpozijuma, radionica i seminara iz oblasti ekologije, biodiverziteta i zaštite životne sredine, hidrobiologije, algologije.

Koautor sam jednog univerzitetskog udžbenika (Hidrobiologija, 2009), dok je drugi univerzitetski udžbenik čiji sam jedini autor (Biocenologija), dobio pozitivne recenzije od oba recenzenta i trenutno se nalazi u daljoj proceduri, koja, do momenta moje prijave na konkurs, još uvijek nije završena.

Počev od 2013. godine, aktivni sam saradnik Ispitnog centra Crne Gore (izrada testova za Državno takmičenje iz biologije i testova za polaganje Male mature iz oblasti biologije), kao i član određenog broja komisija u Ispitnom Centru.

Član sam Uređivačkog savjeta za izradu Botaničkog leksikona Crne Gore, u okviru Crnogorske akademije nauka i umjetnosti (CANU), kao i recenzent za nekoliko međunarodnih naučnih časopisa. Zvanični sam sudski vještak iz oblasti ekologije.

Podaci o radnim mjestima i izborima u zvanja

1997–2008: Saradnik i nastavni na Prirodno-matematičkom fakultetu, Studijski program Biologija. U navedenom periodu bila sam angažovana u izvođenju vježbi na predmetima „Alge, gljive i lišaji“ i „Limnologija“, a 2006. godine pored vježbi na ovim predmetima, bila sam angažovana i kao predavač na predmetima „Zaštita životne sredine“ i „Biologija mora“.

2008–2013: Docent (Bilten Univerziteta Crne Gore br. 229 od 21.03.2008.) na Prirodno-matematičkom fakultetu, Studijski program Biologija (predmeti: „Alge, gljive i lišaji“, „Hidrobiologija“, „Biocenologija“ i „Ekologija populacija“). Počev od 2009. godine izvodim i nastavu na Metalurško-tehnološkom fakultetu u Podgorici (smjer – Zaštita životne sredine) na predmetu „Biološki procesi u životnoj sredini“.

2013–2018: Vanredni profesor (Bilten Univerziteta Crne Gore br. 307 od 1.07.2013.) na Prirodno-matematičkom fakultetu, Studijski program Biologija (predmeti: „Alge, gljive i lišaji“, „Hidrobiologija“ i „Biocenologija“). Pored predavanja, takođe držim i vježbe na predmetu „Hidrobiologija“, kao i nastavu na Metalurško-tehnološkom fakultetu u Podgorici (smjer – Zaštita životne sredine) na predmetu „Biološki procesi u životnoj sredini“. Takođe izvodim nastavu i na istomenom predmetu na doktorskim studijama biologije, kao i na više izbornih predmeta na specijalističkim i master studijama biologije.

PREGLED NAJVAŽNIJIH NAUČNIH DJELA

Rakočević, J. (2018): The phytoplankton and Trophic State of Lake Skadar/Shkodra. In: Pešić, V., Karaman, G. & Kostanoy, A. (Eds.): Lake Skadar/Shkodra Environment. The Handbook of Environmental Chemistry, SPRINGER, Berlin, Heidelberg. ISSN: 1867-979X doi: 10.1007/698_2017_233

U ovom poglavlju monografije o Skadarskom jezeru sumirana su višedecenijska istraživanja fitoplanktona, počev od najranijih podataka pa do danas. Opisan je floristički sastav planktonskih algi, njihova biomasa, sezonska dinamika, prostorna distribucija, kao i trofični status jezera na osnovu algi kao bioindikatora, a takođe je napravljeno i poređenje sadašnjeg i nekadašnjeg stanja zajednice fitoplanktona i ukazano na promjene koje su se tokom vremena desile u ovom jezeru.

Rakočević, J. (2018): Application of epilithic diatoms in the ecological assessment of mountain rivers: contribution to the development of biomonitoring tools for Montenegrin aquatic ecosystems using the case study of the Tara River. *Nova Hedwigia*, 106 (3-4): 337-356. ISSN: 0029-5035 doi: 10.1127/nova_hedwigia/2017/0440

Rad opisuje epilitičnu zajednicu silikatnih algi (dijatomija) rijeke Tare, kroz čiji diverzitet, strukturu i abundanciju, uz izračunate dijatomne indekse, je po prvi put izvršena procjena ekološkog statusa u nekoj crnogorskoj rijeci upotrebom dijatomija, a u skladu sa uputstvima evropske direktive o vodama. Time je testirana i primjena ovih algi kao indikatora kvaliteta vode naših rijeka, što predstavlja značajan doprinos razvoju alata za budući nacionalni biomonitoring.

Rakočević, J., Šuković, D., Marić, D. (2018): Distribution and Relationships of Eleven Trace Elements in Muscle of Six Fish Species from Skadar Lake (Montenegro). *Turkish Journal of Fisheries and Aquatic Sciences*, 18: 647-657. ISSN: 1303-2712 doi: 10.4194/1303-2712-v18_5_01

U ovom radu određena je koncentracija 11 odabranih teških metala u mišićnom tkivu 6 vrsta riba sa različitim tipovima ishrane u Skadarskom jezeru i napravljena korelacija količine svakog od metala sa uzrastom, dimenzijama i težinom ribe u cilju utvrđivanja stepena bioakumulacije i procjene eventualnog rizika po zdravlje ljudi. Većina teških metala je u ovom istraživanju po prvi put analizirana u tkivu riba kada je u pitanju Skadarsko jezero i crnogorske vode uopšte.

Rakočević, J. (2012): Summer aspect of phytoplankton community in some Montenegrin lakes: Are there changes after more than two decades? *Archives of Biological Sciences*, 64 (2), 745-755. ISSN: 0354-4664

U radu je dat opis kvalitativnog i kvantitativnog sastava fitoplanktona u 10 crnogorskih jezera (visokoplaninska, ravničarska i akumulacije) i izvršena je komparativna analiza dobijenih rezultata u odnosu na ranije podatke, koja je pokazala da je u 7 od 10 istraživanih jezera vremenom došlo do takve izmjene diverziteta i strukture zajednice, koja nedvosmisleno ukazuje na porast trofičnog nivoa tj. pogoršanje ekološkog statusa u odnosu na period od prije nekoliko decenija.

Rakočević, J., Hollert, H. (2005): Phytoplankton Community and Chlorophyll a as Trophic State Indices of Lake Skadar. *ESPR – Environ. Sci & Pollut Res* 12 (3), 146-152. ISSN: 0944-1344

Rad opisuje sastav, strukturu, biomasu i sezonsku dinamiku fitoplanktona Skadarskog jezera, a po prvi put je izvršena i sveobuhvatna procjena trofičnog statusa ovog jezera na bazi fitoplanktona i odabranih fizičko-hemijskih parametara. Izvedena je i jednačina predviđanja biomase fitoplanktona (koncentracije hlorofila) u cilju utvrđivanja najznačajnijih parametara koji na nju utiču, čime se može predviđjeti prekomjerno namnožavanje algi u ovom jezeru, pa u tom smislu izvedena jednačina predstavlja koristan i veoma značajan alat u upravljanju kvalitetom vode.

Marić, D., Rakočević, J. (2010): Biodiverzitet. U: Crna Gora u XXI stoljeću - u eri kompetitivnosti. Životna sredina i održivi razvoj (Ed. M. Burić). *CANU*, 73/2, 113-150. ISBN: 978-86-7215-244-9

Poglavlje ove monografije predstavlja doprinos poznavanju stanja i ugroženosti biodiverziteta u Crnoj Gori i postojećih mjera njegove zaštite, sa analizom postojećih zakonskih propisa, strateških i planskih dokumenata i sektorskih politika, kako bi se ukazalo na aktivnosti koje najviše prijete biodiverzitetu. Obrađena je i veza biodiverziteta i održivog razvoja i date preporuke za dalje aktivnosti na zaštiti i održivom korišćenju biodiverziteta u Crnoj Gori.
