The IMCEERES multiple degree programme aims to provide students with thorough knowledge and understanding of historical and contemporary developments in the society, politics, economics and culture of Russia and the Post-socialist countries of Central and Eastern Europe and Eurasia.

To this end, the programme is structured to offer a wide variety of options for advanced study of the region's shared Communist past and the ways in which this has shaped - and continues to shape - the dynamics of post-socialist and post-Cold War transformation. The geographical area to be treated by this programme spans therefore across the wider post-socialist world, in a region that encompasses Central & Eastern Europe, Russia, and the newly independent states of the Caucasus and Central Asia.
