

The Cutting-Edge Leaders Group for the Digital Transformation of Buildings Industry - International Centre of Building Information Modeling (B.I.M.)

**SELECTION OF YOUNG STUDENT OF THE ARCHITECTURE AND ENGINEER'S FACULTY IN MONTENEGRO AND ALBANIA**

**Foreword**

The BIM Design Centre is an innovative center of development of different projects worldwide born from the long experience of its founders in the field of Architecture-Engineering-Construction (AEC) sector. Located in different places in Italy across important metropolitan areas, B.D.C. is a multidisciplinary group that wants to valorized the knowledge and the skill of young students, degree students, Ph.D. students or post-doc of Technical University, in order to improve their skills and to acquire new competences in the use of different BIM software tools. By this target the intention of the Group is to select different people coming from Balkan countries to enrolle them in the group for create the best "Team" of professionals designers.

**Call**

The BIM Design Centre are going to select 5 young persons for each country, Montenegro and Albania, coming from technical Univeristies The persons, more suitable to cover the searched positions, will be selected in Podgorica and in Tirana in the mounth of July. The date and the place of the selection will be informed 15 days before it. The selection will be based on the collection of the received european format CV and by a personal colloquium. After the selection the five persons will move to Italy, exactly in Bari (Italy) to learn in three days the fundamental basis of the software Revit Autodesk and its potentiality to connect it to others tools. All expenses of stay in hotel and food will payed from the BDC. The result of the selection will be communicate in 10 days from the colloquium and anyway in the first middle of August. Those ones selected will sign a memorandum of understanding in which they declare to cooperate and to collaborate in the team by using the BIM softwares, before for a testing year and after it for a long stay in the group. The choosen persons will learn by working in a collaborative approach, all BIM softwares, during a range time of a year, to deliver project in BIM workflow.

**Deadline**

It is mandatory to answer to the call by send a complete Curriculum to the mail below , reporting all the important activity made during degree courses, exams, laboratory and thesis work and what practical experience had in the AEC sector. It is important to make evidence: to the personal aptitude to use software, to be passionned of the digital processes, to work and collaborate in a team and to list what softwares you are already able to use.
