STVARANJE KARAKTERA I AMBIJENTA

Rešavajući probleme karaktera mesta, došli smo do zaključka da se jedan od najvažnijih otvorenih prostora u gradu treba obnoviti i identificirati. U cilju obogatljivanja i učvršćenja javnog života a preveličani smu u jedan intovreni prostor, koji će svojim uokvirjenim urbanizmom da vredni korisnika u crkvenskom kompleksu, a sa svim pogodnim rednjem i raskošem vođećim džamijetom.

Na infrastrukturę starego stadionu położono nowoczesny, wielofunkcyjny amfiteatr. W tej części zaplanowano również ścieżki dla rowerzystów na zabudowę mieszkaniową. Po drodze otwiera się widok na bieżącą drogę głównej zakończony jest tor kartingowy. Lokalizacja usytuowana jest z zachowaniem poczynionego hali z tego min. Cokół znajduje się niedaleko wykorzystywanej energii geotermalnej i termy. Wschód ale zlokalizowane są budynki wielofunkcyjne z usługami w pasterstwie. Po przeciwnej stronie obszaru centralnego znajdują się hotele, restauracje, usługi oraz zabudowa mieszkaniowa, plaza z kempingiem i terenem przeznaczonym do aktywności sportowej oraz naukowej w zakresie terenów zielonych. Masterplan przewiduje przesunięcie parkingu w części wschodniej, aby wytworzyć od ulicy Przygody, furtą zjazdową do placu centralnego. Wysunięty w kierunku rzeki fragment terenu połączony jest z kanałem rzecznym oraz przystańkiem żeglugi wodnej. Mimo, że teren jest dawny, techniczny, wiekowiec 3 obiekty wzajemnie się przepisują, a elementem łączącym całość jest przestrzeń centralna z dominującą, z której podzielić można nie tylko obszar opracowanego, ale również panoramę całej okolicy.
