(2016) The potential of SNP-based PCR-RFLP capillary electrophoresis analysis to authenticate and detect admixtures of Mediterranean olive oils. *Electrophoresis* DOI 10.1002/elps. 201500537

### **BOOK CHAPTERS**

Mellidou, I., Georgiadou, E., Kaloudas, D., Kalaitzis, P., Photopoulos, V., Kanellis, A. (2018) Vitamins in “Postharvest Physiology and Biochemistry of Fruits and Vegetables”, Editors: Yahia, E., Carrillo-Lopez, A., Woodhead Publishing, Pages: 359-384, DOI: 10.1016/B978-0-12-813278-4.00017-

Christos Bazakos, Stelios Spaniolas and Panagiotis Kalaitzis (2016) DNA-based approaches for traceability and authentication of olive oil in “Olive Tree Products” - Editor: D. Boskou, Intech press

Loredana Lopez, Gaetano Perrotta, Panagiotis Kalaitzis, Rosario Muleo (2016) Transcriptomics in olive (*Olea europaea L.*) in Olea Europea in “The Olive Tree Genome”, Editor E. Rugini, I. Baldoni, Springer International Publishing

### **SOFTWARE**

**OliveId** is a semi-automatic computational tool, that has been developed for the morphological analysis of olive fruits, leaves and endocarps. In particular, quantitative and qualitative characters of fruits, leaves and endocarps, such as size, shape, symmetry, contour roughness and presence of additional structures (nipple, petiole, etc.) are determined. Moreover, this software can be easily used to describe the morphologies of other crop species, such as tomato, pear, potato, grapevine, etc.
