PROGRAM

LIVE, LEARN AND RESEARCH

Hoffmann-La Roche

Doing now what patients need next

We have been committed to improving lives since the company was founded in 1896 in Basel, Switzerland. Today, Roche creates innovative medicines and diagnostic tests that help millions of patients globally.

Roche was one of the first companies to bring targeted treatments to patients. With our combined strength in pharmaceuticals and diagnostics, we are better equipped than any other company to further drive personalised healthcare. Two-thirds of our Research and Development projects are being developed with companion diagnostics.

We offer doctors profound information to guide treatments and to answer more patients' questions than any other company. And our tests enable hospitals and labs to deliver that information quickly and reliably.

We are a force of over 90,000 people working together across more than 100 countries. Roche is consistently ranked as employer of choice by its employees and by external institutions.

Value we create
