## Part I. Introduction to the Knowledge Sharing Program

### 1. Background

Knowledge sharing has emerged as an important instrument of development and economic cooperation, proving to effectively improve countries' policy and institutional capacities. Various entities including developing and developed countries, and international organizations such as the OECD and World Bank have endorsed knowledge sharing as a means to deepen mutual learning and create horizontal partnerships.

Korea has successfully transitioned from an aid recipient to a donor country over the past century. To make full use of such an exceptional experience, the Ministry of Economy and Finance of Korea (MOEF) launched a mutual learning program called the Knowledge Sharing Program (KSP) in 2004. KSP conducts joint research and studies to support public efforts in achieving socio-economic development.

Through in-depth and comprehensive analyses of challenges, the program generates practical recommendations and proposes solutions with reference to Korea's comparable experiences, practices and plans. The program also provides opportunities for institutional, organizational and individual capacity building and networking programs.

As of 2022, nearly 670 projects covering over 1,400 topics have been implemented with more than 90 countries around the world.

### 2. Objectives

- (1) Enhance partner country's policy environment through strengthened frameworks, mechanisms, systems and capacities at institutional, organizational and individual levels
- (2) Catalyze the development and implementation of effective and efficient national and international projects/programs for socio-economic development
- (3) Establish foundations for mutually beneficial economic cooperation

### 3. Structure

MOEF, the supervising ministry of KSP, oversees the overall program and works with implementing agencies that manage individual projects. The implementing agencies are the Korea Development Institute (KDI), Korea Eximbank (KEXIM), and Korea Trade-Investment Promotion Agency (KOTRA). Individual projects are executed by KSP Consultants, a team of Korean experts.

## 4. KSP support

### 4.1. Standard modality

KSP is a one-year consultation program implemented in the span of two calendar years (e.g. 2025/26 KSP begins in 2025 and ends in 2026). Around 30 to 40 bilateral projects are implemented each year with about 20 partner countries.

Key deliverables of a KSP project are (1) a country- and problem-specific recommendation report drafted by the Korean executing entity with inputs from the partner country and (2) a 5-day capacity-building workshop for national officials and staff. The report is published in English and additional publication in the local language may be available upon the partner country's request.

### 4.2. Additional modalities

KSP supports a selected number of projects under 2 non-standard modalities: *Fast-track KSP* and *Multiple-year KSP*.

- **Fast-track KSP** undergoes an accelerated appraisal and approval procedure to support highly urgent matters resulting from the reasons below:
  - *Emergency response and recovery*: response to natural/social disasters, infectious diseases, significant social, economic, political changes or crises
  - *Key state-led policy/program*: timely support for implementing policies, initiatives, etc. to address key agendas with defined completion dates
  - *Diplomatic agenda*: cooperation in areas under bi/multilateral diplomatic agendas agreed at summits and high-level meetings
  - *Bilateral economic cooperation*: timely support for ongoing and forthcoming economic cooperation
- **Multiple-year KSP** takes a programmatic approach to support countries developing and implementing strategies and/or pipeline projects to bridge policy, technical and capacity gaps and barriers. KSP support may be approved for up to 3 project cycles.

### 4.3. Project areas

KSP supports projects in the following areas in which Korea has strong expertise (see Appendix 1 for specific areas):

- Economic development planning
- Macro-financial policy
- Public finance
- Industrial policy
- Trade and export promotion
- Business and SME (small and medium enterprises) development
- Science and technology, R&D, ICT
- Transport and urban development
- Energy
- Water and sanitation
- Environment

- Rural development
- Health and medicine
- Social welfare
- Education and HR (human resource) development
- Public administration
- Employment and labor
- Other (culture, tourism, etc.)

#### 4.4. Cycle

Stage	Sub-stages
1. Identification	<b>Submission of Proposal:</b> Country submits (1) Project proposal, (2) Priority list, and (3) Letter of Request to the Korean Embassy
	<b>Review and Approval:</b> MOEF and government of Korea conduct thorough preliminary review. Upon approval, MOEF notifies the partner country's coordinating institution
2. Preparation	<b>Preliminary meeting:</b> Partner country and implementing agency specify research topics and activity scope
	<b>Procurement and legal arrangements:</b> Implementing agency selects KSP Consultants through an open, transparent and competitive process
3. Implementation	<b>Launching seminar and high-level meeting:</b> Interested parties specify research questions and work plan
	<b>Policy seminar and in-depth study:</b> KSP team conducts on-site due diligence at the project country
	<b>Interim reporting and practitioner's workshop:</b> KSP team shares research progress, and the partner country's delegation makes site visits to relevant Korean institutions
	<b>Senior policy dialogue and final reporting:</b> KSP team presents results, and interested parties discuss and review final recommendations
4. Ex-Post Monitoring	<b>Project result monitoring and evaluation:</b> Implementing agency conducts interviews and research to understand countries' usage of KSP results (outputs) and track their progress in meeting project goals

\* See Appendix 2 for details of the implementation stage, and Appendix 3 for details of the partner country's responsibilities.

#### 4.5. Cost

The Korean government covers project costs for ODA recipient countries defined by the OECD Development Assistance Committee (Appendix 4). The budget for a single KSP project ranges from 250,000 to 500,000 USD. The partner country may bear in-kind expenses such as costs associated with the meeting venue and travel expenses to Korea. Details are stipulated in the Memorandum of Understanding and/or Activity Agreement.

\* MOEF does **not** provide direct financial support to the partner country.

## Part II. Applying for the KSP

### 1. Writing the Proposal

Government institutions (ministries, agencies, etc.) that wish to apply for the KSP must complete the *project proposal* template (*Form 2*).

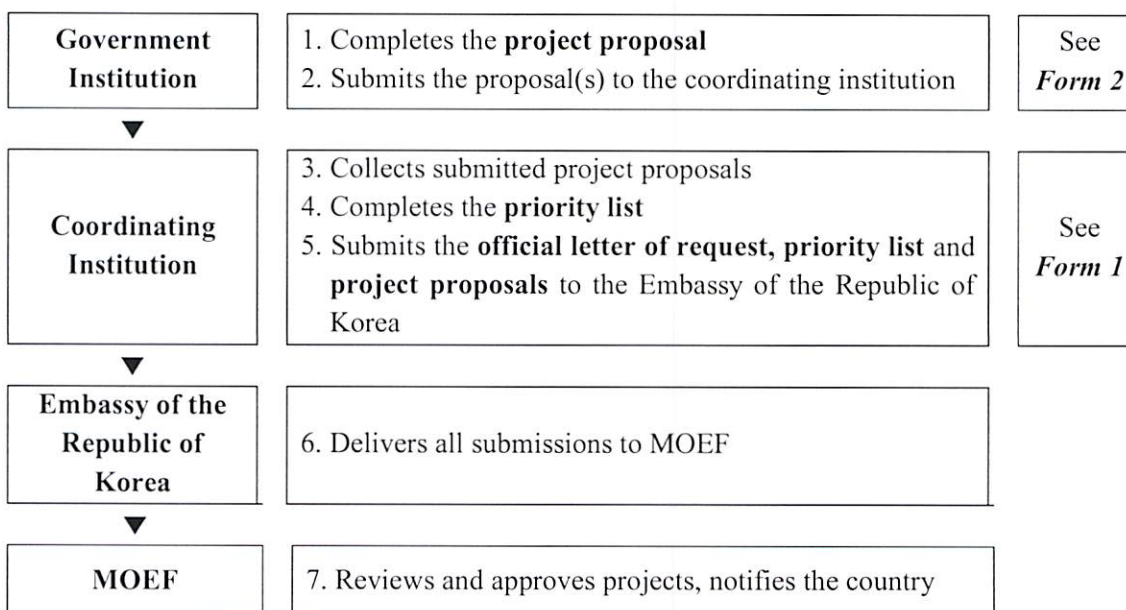

Throughout the proposal, it is important to ensure that the proposed project is

- consistent with KSP’s objectives<sup>1</sup>
- aligns with the national development plans/strategies and priorities, pertinent to areas where Korea has comparative advantages
- complements and does not overlap with past and ongoing projects implemented by the country/development partners
- expressed in a clear and detailed manner (pay special attention when explaining project necessity, proposed intervention, and plans to build on the project’s results)

Examples of projects that are ineligible for approval include the following:

- projects submitted by a private organization
- projects that provide humanitarian aid
- projects that directly finance the construction of physical infrastructures or the purchase of software systems<sup>2</sup>
- projects that are commercial/for-profit
- projects in the fields of national defense, religion, peace and security

### 2. Submitting the Proposal

<sup>1</sup> KSP projects support policy and institutional development at the national and sub-national level, implementation of large-scale projects and adoption of software systems through pre-feasibility studies, and private sector development.

<sup>2</sup> A proposal designed to prepare the project country for applying to Korea’s development finance programs (EDCF, EDPF, Export Finance) and/or ODA programs (KOICA, etc.) is eligible to apply for KSP support.

### **(1) Government Institution → Coordinating Institution**

A ministry or government-affiliated organization develops the *project proposal (Forms 2, 3, 4)* and delivers the document to the coordinating institution. *Proposals that are not submitted via the coordinating institution will not be reviewed by MOEF.*

\* Required forms by project type: Standard KSP - *Form 2*; Fast-track KSP - *Forms 2 and 3*; Multiple-year KSP - *Forms 2 and 4*

\*\* Coordinating institution: project country's institution responsible for ODA or economic/international cooperation with the Republic of Korea

### **(2) Coordinating Institution → Korean Embassy**

The coordinating institution collects project proposals from government institutions and completes the *priority list (Form 1)*, considering the urgency and importance of the projects based on countries' policy priorities and national development plans.

Then, the coordinating institution sends an *official letter of request for KSP* support with the priority list and project proposals to the Embassy of the Republic of Korea. The proposal package must include all documents below for review by MOEF:

- (1) Official letter of request
- (2) Priority list
- (3) Project proposals sorted according to the priority list

If the coordinating institution wishes to make additional submissions, the proposal package must include (1) a new official letter of request, (2) an updated priority list and (3) additional project proposals. Project proposals that have been submitted do not have to be resubmitted.

### **(3) Korean Embassy → MOEF**

The Korean embassy forwards all documents to MOEF.

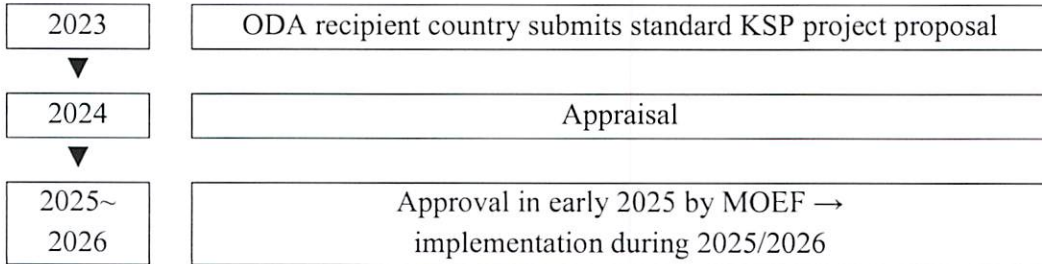

### **(4) MOEF → Korean Embassy, coordinating institution**

MOEF reviews and approves projects in consideration of their expected impact as well as the program portfolio of the relevant cycle, Korea's national strategies, etc.

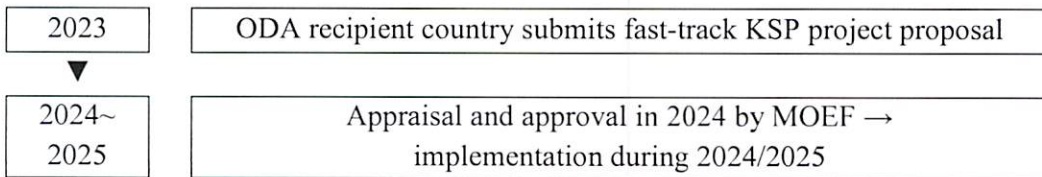

Then, MOEF notifies the coordinating institution of approved projects with an official letter by the first quarter of 2024.

### 3. Schedule

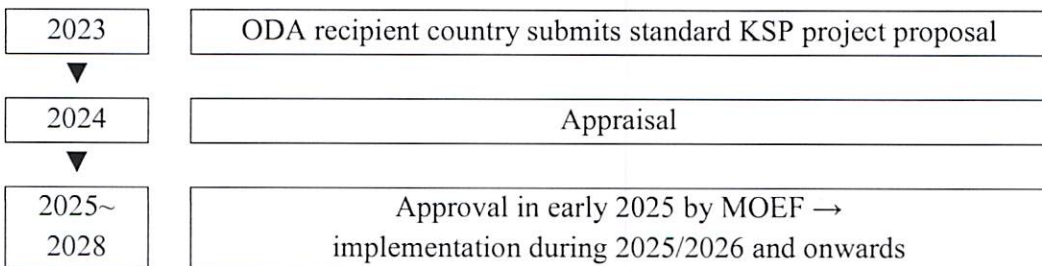

**Standard KSP:** ODA project proposals submitted in 2023 will undergo a thorough preliminary review by the Korean government in 2024. Approved projects will be implemented in the 2025/2026 cycle (launch in 2025, close in 2026).

**Fast-track KSP:** ODA project proposals submitted in 2023 and deemed highly urgent and important will undergo an accelerated appraisal and approval procedure to be implemented in the 2024/2025 cycle (launch in 2024, close in 2025).

**Multiple-year KSP:** ODA project proposals submitted in 2023 and deemed highly in need of continuous KSP support will undergo a thorough review in 2024 and be implemented for up to 3 project cycles - 2025/2026, 2026/2027, 2027/2028.

## **Appendix 3. Responsibilities of Partner Country**

### **1. Recommend qualified local consultants**

The partner country is responsible for recommending qualified local consultants who have expertise in the project area. The scope of work is as follows:

- (1) conduct research on the country's background/status in the project context
- (2) partly draft the KSP report
- (3) cooperate with the Korean KSP team to execute the project

### **2. Provide in-kind contribution**

The Korean government may ask the partner country to make in-kind contributions within available resources (e.g. provision of office space, interpretation, etc.) to coordinate the visits of Korean experts to the partner country during any stage of the project cycle.

Details are to be stipulated in the Memorandum of Understanding (MoU) and Activity Agreement between the two counterpart organizations.

### **3. Arrange meetings and organize seminars**

The partner country is responsible for facilitating the execution of sub-stages that take place at the partner country:

- arrange meetings with senior government officials and experts specializing in the study's topic upon the request of the Korean experts; and
- organize seminars/workshops and provide logistical supports

### **4. Organize the delegation's visit**

The partner country is responsible for composing its delegation to Korea for the Interim Reporting and Practitioners' Workshop.

### 3. Further indication

Only a limited number of proposals will be approved under the fast-track modality due to limited resources. Please indicate your institution's preferred option in case this proposal is **not decided to move forward** as a fast-track KSP.

Next step	
<input type="checkbox"/>	Review and consider as a <b>standard KSP</b> implemented in the <b>2025/2026</b> cycle
<input type="checkbox"/>	Withdraw from consideration

### 4. Letter of fast-track request

Please attach an official letter that briefly summarizes the urgent necessity of this request, endorsed by the senior management of your institution.

## Multiple-year KSP request

### Notes

<sup>1</sup> Complete this form if your institution is applying for a **multiple-year KSP** – project implemented for **up to 3 cycles (2025/2026 ~ 2027/2028)**.

<sup>2</sup> Direct financial support, transfer of goods, and longer-term training are **non-eligible** forms of support during the entire period.

### 1. Context on multiple-year necessity

*Present how this multiple-year proposal takes a programmatic approach to address the overarching problem. What is the ultimate goal envisioned through this proposal, and why is continuous KSP support appropriate rather than single-year support?*

*Describe the details (objectives, outcomes) of succeeding KSP project(s) in the table below.*

*\* Specific topics and scope of work are subject to adjustment based on the Y1 results and the then policy environment.*

Project year	Title	Objectives, outcomes
Y1: 2025/2026 KSP (addressed in Form 2)		
Y2: 2026/2027 KSP		
Y3: 2027/2028 KSP		
Goal	<i>Ultimately anticipated changes that this multiple-year KSP proposal aims to contribute to.</i>	

Type here

### 2. Further indication

*Only a limited number of proposals will be approved under the multiple-year modality due to limited resources. Please indicate your institution's preferred option in case this proposal is not decided to move forward as a multiple-year KSP.*

Next step	
<input type="checkbox"/>	Review and consider as a <b>standard KSP</b> implemented for single-year in the <b>2025/2026</b> cycle
<input type="checkbox"/>	Withdraw from consideration
