

SPEAKER BIOGRAPHIE

An independent international cooperation consultant and geopolitical analyst, Sanja Vujačić was born in Zagreb - Croatia. She earned her PhD in Political Science from Paris-Saclay University -PSU in France. Her research examines regulation of interstate relations in a position of dependence, throughout a systemic approach to international relations and complex thought. Apart from her research work in this field at CARPO and VIP laboratories, she worked as a research engineer in charge of European R&D and international

cooperation programmes for the components of the Paris-Saclay research & business cluster in the field of innovation: mobility and handicap in the smart city, Eldercare, E-Health, humanoid robotics, energy and digital transformation in the automotive/transport sector. Together with LISV laboratory and Mov'eo - the competitiveness cluster which brings together the main players of the French automotive industry in the collaborative R&D field, she participated in various transdisciplinary projects such as EIT Knowledge Innovation Communities - KIC Urban Mobility; piloted European projects like AAL MOBILITY-MOTIVATOR and worked on academic partnerships between PSU and Tshwane University of Technology South Africa, Pontifical Catholic University of Peru and Lebanese University.

Mrs Vujačić is a member of the Croatian international studies association – HUMS and of the Institute for European and globalization studies – IEGS. She is writing and publishing articles and geopolitical analyses in Croatian newspapers and peer-reviewed journals.

Her previous work also included ten years' experience in professional training and in hierarchical and transversal management for small firms and large-scale companies such as the PSA-Peugeot Group and Agrokor d.d.
