Nemanja Batrićević

Osnovne karakteristike

- Statistika se najčešće definiše kao set matematičkih procedura za organizovanje i interpretiranje informacija
- Statistika stoga ima (najmanje) dvije funkcije:
 1. Organizovanje i sumiranje informacija
 2. Daje odgovor na pitanja koja su predmet našeg istraživanja

Populacija i uzorak

- Populacija predstavlja cjelokupan set pojedinaca relevantnih za konkretno istraživačko pitanje
- Karakteristike populacije nazivamo – **parametrima**
- Uzorak je podskup pojedinaca uzetih iz populacije, koji predstavljaju cijelu populaciju u datoj studiji
 - *Slučajan i neslučajan uzorak*
- Karakteristike uzorka nazivamo - **statistika**

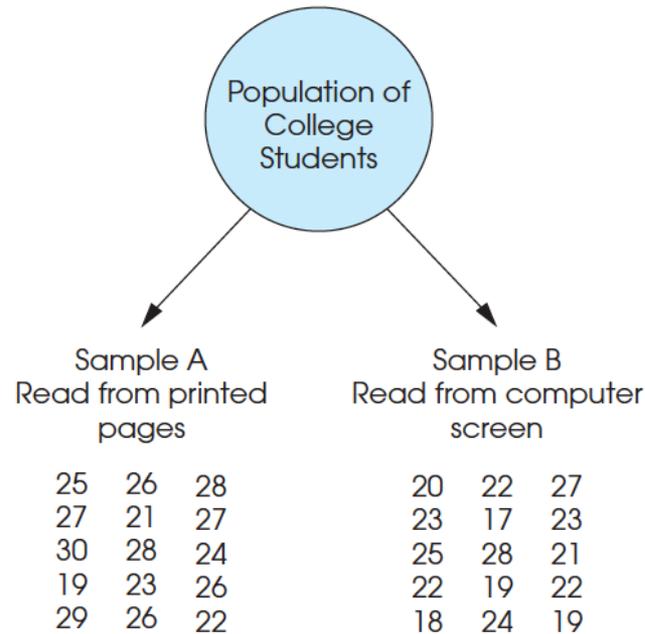

Grane statistike

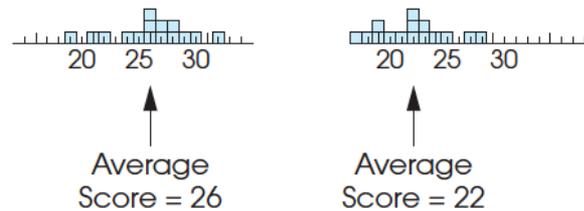

- **Deskriptivna statistika**
 - Mjere centralne tendencije
 - Mjere varijacije
- **Statističko zaključivanje** – tehnike generalizovanja na populaciju na osnovu uzorka
- **Uzoračka greška** – prirodno odstupanje (greška) koja postoji između *statistike* i *parametara*

Step 1
Experiment:
Compare two
studying methods

Data
Test scores for the
students in each
sample

Step 2
Descriptive statistics:
Organize and simplify

Step 3
Inferential statistics:
Interpret results

The sample data show a 4-point difference between the two methods of studying. However, there are two ways to interpret the results.

1. There actually is no difference between the two studying methods, and the sample difference is due to chance (sampling error).
2. There really is a difference between the two methods, and the sample data accurately reflect this difference.

The goal of inferential statistics is to help researchers decide between the two interpretations.

rasturanja

FIGURE 16

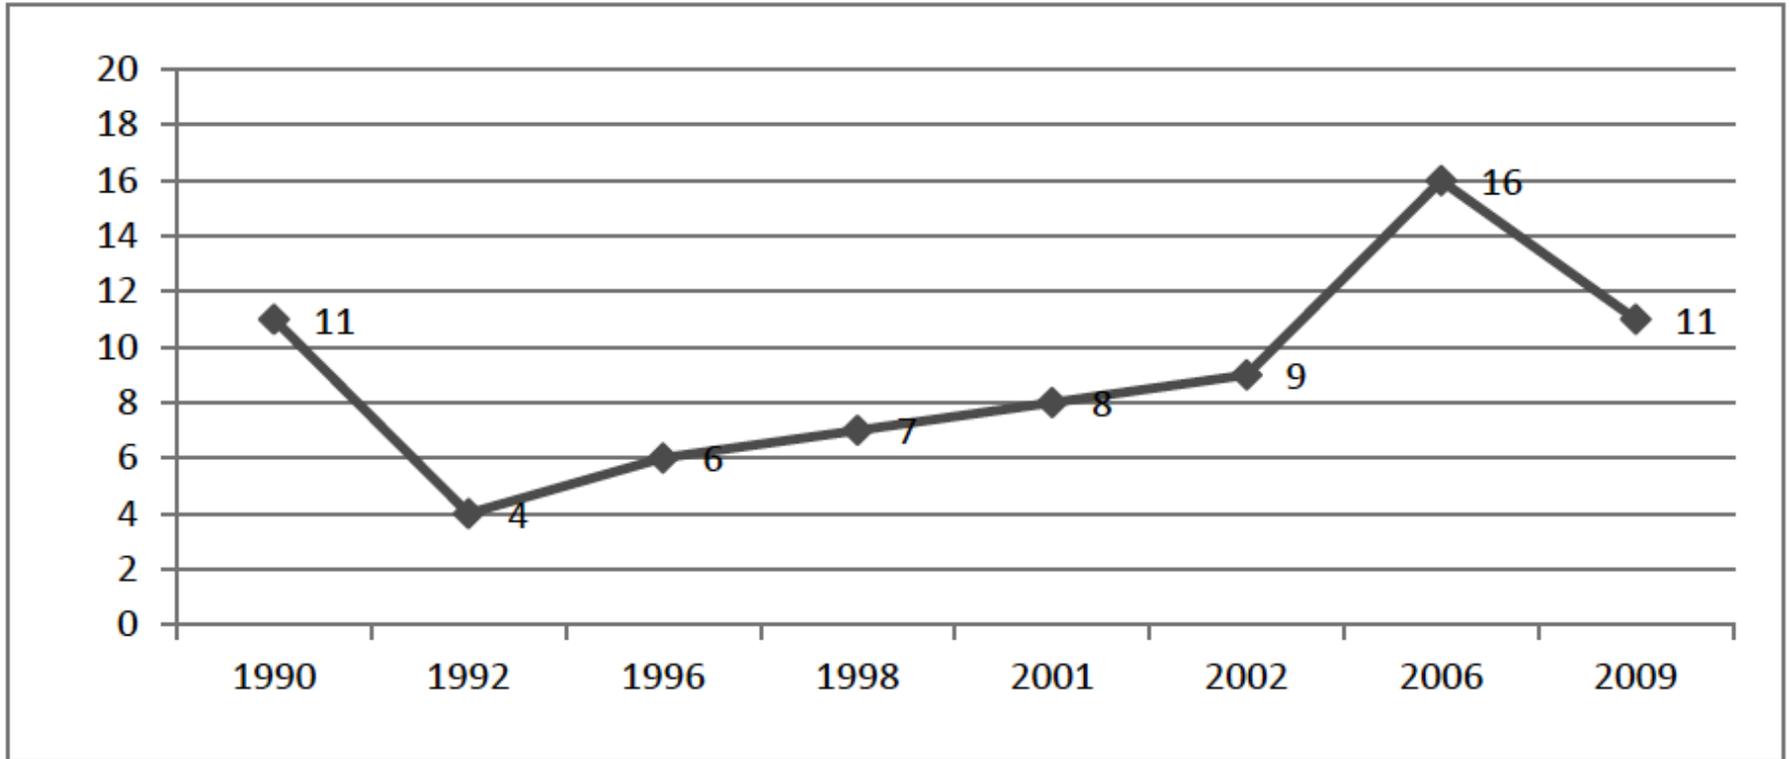

Standard deviation of batting averages for all full-time players by year for the first 100 years of professional baseball. Note the regular decline.

01.38.0013
 Analisis regresi linier menunjukkan bahwa terdapat pengaruh yang signifikan antara variabel Inflasi dan Tarif. Hal ini dapat dilihat dari koefisien determinasi yang bernilai 0,788 yang menunjukkan bahwa 78,8% variasi tarif dapat dijelaskan oleh variasi inflasi.

Over 100 Million Now Receiving Federal Welfare

2:40 PM, AUG 8, 2012 • BY DANIEL HALPER 

A new chart set to be released later today by the Republican side of the Senate Budget Committee details a startling statistic: "Over 100 Million People in U.S. Now Receiving Some Form Of Federal Welfare."
