

Fam. Magnoliaceae

plod

Magnolia grandiflora

Fam. Magnoliaceae

Illicium verum – zvjezdasti anis

A close-up photograph of a laurel plant (Laurus nobilis). The image shows several clusters of small, bright yellow flowers. The leaves are dark green, glossy, and have an elliptical shape with prominent veins. In the upper left corner, there is an inset image showing a branch with several dark, round berries. The main image is set against a dark, blurred background.

Laurus nobilis – lovor

Fam. Lauraceae

Cinnamomum camphora – kamforovo drvo

Fam. Lauraceae

Cinnamomum zeylanicum, *C. loureirii* – cimet
