<b>Ciljevi izučavanja predmeta</b>	Mass phenomenon is one of the basic features of modern civilization. Therefore, it is necessary to scientifically describe, analyze and report such occurrences through different indicators. This is precisely the task of statistics as a scientific discipline. Students are introduced to basic statistical concepts and statistical methods.			
<b>Ishodi učenja</b>	After passing exam in Statistics, students are expected to be able to: • correctly interpret basic statistical concepts; • select and apply appropriate statistical methods in the specific case; • analyse and interpret the results obtained using statistical methods; • follow and understand professional and scientific literature in which results are expressed in statistical terms and symbols; • plan, implement and interpret simple research tasks in which the acquired statistics knowledge is used.
